6) 3.3V T.M.D.S., 50 ohms
The DVI-HDTV input terminal is compliant with the EIA-861 standard and is not intended for use with personal computers.

TruSurround™ by SRS (SRS)®

TruSurround is a trademark of SRS Labs, Inc. SRS and the SRS symbol are registered trademarks of SRS Labs, Inc. in the United States and in select foreign countries. SRS and TruSurround are incorporated under license from SRS Labs, Inc. and are protected under United States Patent Nos. 4,748,669 and 4,841,572 with numerous additional issued and pending foreign patents. Purchase of this product does not convey the right to sell recordings made with the TruSurround technology.

● SRS (SOUND RETRIEVAL SYSTEM)

The ● SRS (SOUND RETRIEVAL SYSTEM) is manufactured by Sony Corporation under license from SRS Labs, Inc. It is covered by U.S. Patent No. 4,748,669. Other U.S. and foreign patents pending.

The word 'SRS' and the SRS symbol ● are registered trademarks of SRS Labs, Inc. BBE and BBE symbol are trademarks of BBE Sound, Inc. and are licensed by BBE Sound, Inc. under U.S. Patent No. 4,638,258 and 4,482,866.

Television system

American TV standard, NTSC

Channel coverage

VHF: 2-13/ UHF: 14-69/ CATV: 1-125

Picture tube

FD Trinitron[®] tube

Visible screen size

32-inch picture measured diagonally (KV-32HS510//34DRC510 Only)

34-inch picture measured diagonally (KV-34HS510 Only)

36-inch picture measured diagonally (KV-36HS510/38DRC510 Only)

Actual screen size

34-inch measured diagonally (KV-32HS510//34DRC510 Only)

36-inch measured diagonally (KV-34HS510 Only)

38-inch measured diagonally (KV-36HS510/38DRC510 Only)

Antenna

75 ohm external terminal for VHF/UHF

Supplied Accessories

Remote Commander RM-RM-Y190 (All Except KV-34HS510)

Remote Commander RM-RM-Y191 (KV-34HS510 Only)

Two Size AA (R6) Batteries

Optional Accessories

AV Cable: VMC-810/820/830 HG

Audio Cable: RKC-515HG

Component Video Cable: VMC-10/30 HG

TV Stand: SU-32HS1 (KV-32HS510/34DRC510 Only)

TV Stand: SU-34HD1 (KV-34HS510 Only)

TV Stand: SU-36HS1 (KV-36HS510/38DRC510 Only)

Memory Stick Media: 8MB (MSA-8A); 16MB (MSA-16A);

32MB (MSA-32A); 64MB (MSA-64A); 128MB (MSA-128A)

WARNINGS AND CAUTIONS

CAUTION

Short circuit the anode of the picture tube and the anode cap to the metal chassis, CRT shield, or carbon painted on the CRT, after removing the anode.

WARNING!!

An isolation transformer should be used during any service to avoid possible shock hazard, because of live chassis. The chassis of this receiver is directly connected to the ac power line.

SAFETY-RELATED COMPONENT WARNING!!

Components identified by shading and  mark on the schematic diagrams, exploded views, and in the parts list are critical for safe operation. Replace these components with Sony parts whose part numbers appear as shown in this manual or in supplements published by Sony. Circuit adjustments that are critical for safe operation are identified in this manual. Follow these procedures whenever critical components are replaced or improper operation is suspected.

ATTENTION!!

Après avoir déconnecté le cap de l'anode, court-circuiter l'anode du tube cathodique et celui de l'anode du cap au châssis métallique de l'appareil, ou la couche de carbone peinte sur le tube cathodique ou au blindage du tube cathodique.

Afin d'éviter tout risque d'électrocution provenant d'un châssis sous tension, un transformateur d'isolement doit être utilisé lors de tout dépannage. Le châssis de ce récepteur est directement raccordé à l'alimentation du secteur.

ATTENTION AUX COMPOSANTS RELATIFS A LA SECURITE!!

Les composants identifiés par une trame et par une marque  sur les schémas de principe, les vues explosées et les listes de pièces sont d'une importance critique pour la sécurité du fonctionnement. Ne les remplacer que par des composants Sony dont le numéro de pièce est indiqué dans le présent manuel ou dans des suppléments publiés par Sony. Les réglages de circuit dont l'importance est critique pour la sécurité du fonctionnement sont identifiés dans le présent manuel. Suivre ces procédures lors de chaque remplacement de composants critiques, ou lorsqu'un mauvais fonctionnement suspecte.

SAFETY CHECK-OUT

After correcting the original service problem, perform the following safety checks before releasing the set to the customer:

1. Check the area of your repair for unsoldered or poorly soldered connections. Check the entire board surface for solder splashes and bridges.
2. Check the interboard wiring to ensure that no wires are "pinched" or touching high-wattage resistors.
3. Check that all control knobs, shields, covers, ground straps, and mounting hardware have been replaced. Be absolutely certain that you have replaced all the insulators.
4. Look for unauthorized replacement parts, particularly transistors, that were installed during a previous repair. Point them out to the customer and recommend their replacement.
5. Look for parts which, though functioning, show obvious signs of deterioration. Point them out to the customer and recommend their replacement.
6. Check the line cords for cracks and abrasion. Recommend the replacement of any such line cord to the customer.
7. Check the B+ and HV to see if they are specified values. Make sure your instruments are accurate; be suspicious of your HV meter if sets always have low HV.
8. Check the antenna terminals, metal trim, "metallized" knobs, screws, and all other exposed metal parts for AC leakage. Check leakage as described below.

Leakage Test

The AC leakage from any exposed metal part to earth ground and from all exposed metal parts to any exposed metal part having a return to chassis, must not exceed 0.5 mA (500 microamperes). Leakage current can be measured by any one of three methods.

1. A commercial leakage tester, such as the Simpson 229 or RCA WT-540A. Follow the manufacturers' instructions to use these instructions.
2. A battery-operated AC milliammeter. The Data Precision 245 digital multimeter is suitable for this job.
3. Measuring the voltage drop across a resistor by means of a VOM or battery-operated AC voltmeter. The "limit" indication is 0.75 V, so analog meters must have an accurate low voltage scale. The Simpson's 250 and Sanwa SH-63TRD are examples of passive VOMs that are suitable. Nearly all battery-operated digital multimeters that have a 2 VAC range are suitable (see Figure A).

How to Find a Good Earth Ground

A cold-water pipe is a guaranteed earth ground; the cover-plate retaining screw on most AC outlet boxes is also at earth ground. If the retaining screw is to be used as your earth ground, verify that it is at ground by measuring the resistance between it and a cold-water pipe with an ohmmeter. The reading should be zero ohms.

If a cold-water pipe is not accessible, connect a 60- to 100-watt trouble-light (not a neon lamp) between the hot side of the receptacle and the retaining screw. Try both slots, if necessary, to locate the hot side on the line; the lamp should light at normal brilliance if the screw is at ground potential (see Figure B).

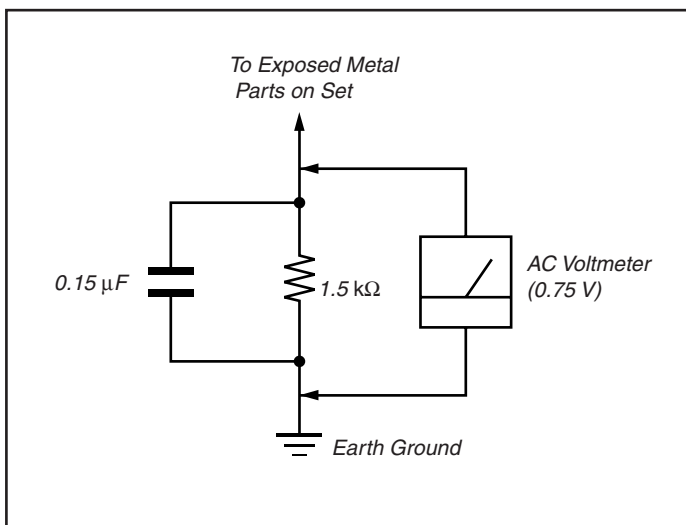

Figure A. Using an AC voltmeter to check AC leakage.

Figure B. Checking for earth ground.

SELF-DIAGNOSTIC FUNCTION

The units in this manual contain a self-diagnostic function. If an error occurs, the STANDBY/TIMER LED will automatically begin to flash. The number of times the LED flashes translates to a probable source of the problem. A definition of the STANDBY/TIMER LED flash indicators is listed in the instruction manual for the user's knowledge and reference. If an error symptom cannot be reproduced, the Remote Commander can be used to review the failure occurrence data stored in memory to reveal past problems and how often these problems occur.

Diagnostic Test Indicators

When an error occurs, the STANDBY/TIMER LED will flash a set number of times to indicate the possible cause of the problem. If there is more than one error, the LED will identify the first of the problem areas.

Results for all of the following diagnostic items are displayed on screen. If the screen displays a "0", an error has occurred.

Diagnostic Item	No. of times STANDBY / TIMER lamp flashes	Display Result	Probable Cause Location	Detected Symptoms
Power does not turn on	Does not light	-----	<ul style="list-style-type: none"> Power cord is not plugged in. Fuse is burned out (F501). (A Board) 	<ul style="list-style-type: none"> Power does not come on. No power is supplied to the TV. AC Power supply is faulty.
+B Overcurrent (OCP)*	2 times	2:0 or 2:1	<ul style="list-style-type: none"> H.OUT (Q5030) is shorted. (D Board) +B PWM (Q5003) is shorted. (D Board) 	<ul style="list-style-type: none"> Power does not come on. Load on power line shorted.
Low +B Overvoltage (OVP)	3 times	3:0 or 3:1	<ul style="list-style-type: none"> IC6505 is faulty. (D Board) 	<ul style="list-style-type: none"> Has entered standby mode.
Vertical Deflection Stopped	4 times	4:0 or 4:1	<ul style="list-style-type: none"> 15V is not supplied. (D Board) IC5004 is faulty. (D Board) 	<ul style="list-style-type: none"> Has entered standby mode after Horizontal raster. Vertical deflection pulse is stopped. Power line is shorted or power supply is stopped.
White Balance Failure (not balanced)	5 times	5:0 or 5:1	<ul style="list-style-type: none"> Video OUT (IC9001-IC9003) is faulty. (CH, CX Board) CRT drive (IC2801) is faulty. (B Board) G2 is improperly adjusted.** 	<ul style="list-style-type: none"> No raster is generated. CRT cathode current detection reference pulse output is small.
LOW +B OCP/OVP (overcurrent/overvoltage)***	6 times	6:0 or 6:1	<ul style="list-style-type: none"> +5 line is overloaded. (A, B, M Boards) +5 line is shorted. (A, B, M Boards) IC504 is faulty. (A Board) 	<ul style="list-style-type: none"> No picture
Horizontal Deflection Stopped	7 times	7:0 or 7:1		<ul style="list-style-type: none"> No picture

* If a +B overcurrent is detected, stoppage of the vertical deflection is detected simultaneously. The symptom that is diagnosed first by the microcontroller is displayed on the screen.

** Refer to Screen (G2) in Section 2-5 of this manual.

*** If STANDBY/STEREO LED flashes six (6) times, unplug the unit and wait 10 seconds before performing the adjustment.

Display of Standby/Timer LED Flash Count

* One flash count is not used for self-diagnostic.

Stopping the Standby/Timer LED Flash

Turn off the power switch on the TV main unit or unplug the power cord from the outlet to stop the STANDBY/TIMER LAMP from flashing.

Self-Diagnostic Screen Display

For errors with symptoms such as “power sometimes shuts off” or “screen sometimes goes out” that cannot be confirmed, it is possible to bring up past occurrences of failure on the screen for confirmation.

To Bring Up Screen Test

In standby mode, press buttons on the Remote Commander sequentially, in rapid succession, as shown below:

DISPLAY ➡ Channel **5** ➡ Sound volume **[-]** ➡ Power ON.

SELF DIAGNOSIS

```

2: +B OCP
0
3: +B OVP
0
4: VSTOP
0
5: AKB          1
6: LOWB         0
  
```

Numeral “0”
means that no fault was detected.
Numerical “1”
means a fault was detected one
time only.

Handling of Self-Diagnostic Screen Display

Since the diagnostic results displayed on the screen are not automatically cleared, always check the self-diagnostic screen during repairs. When you have completed the repairs, clear the result display to “0”.

Unless the result display is cleared to “0”, the self-diagnostic function will not be able to detect subsequent faults after completion of the repairs.

Clearing the Result Display

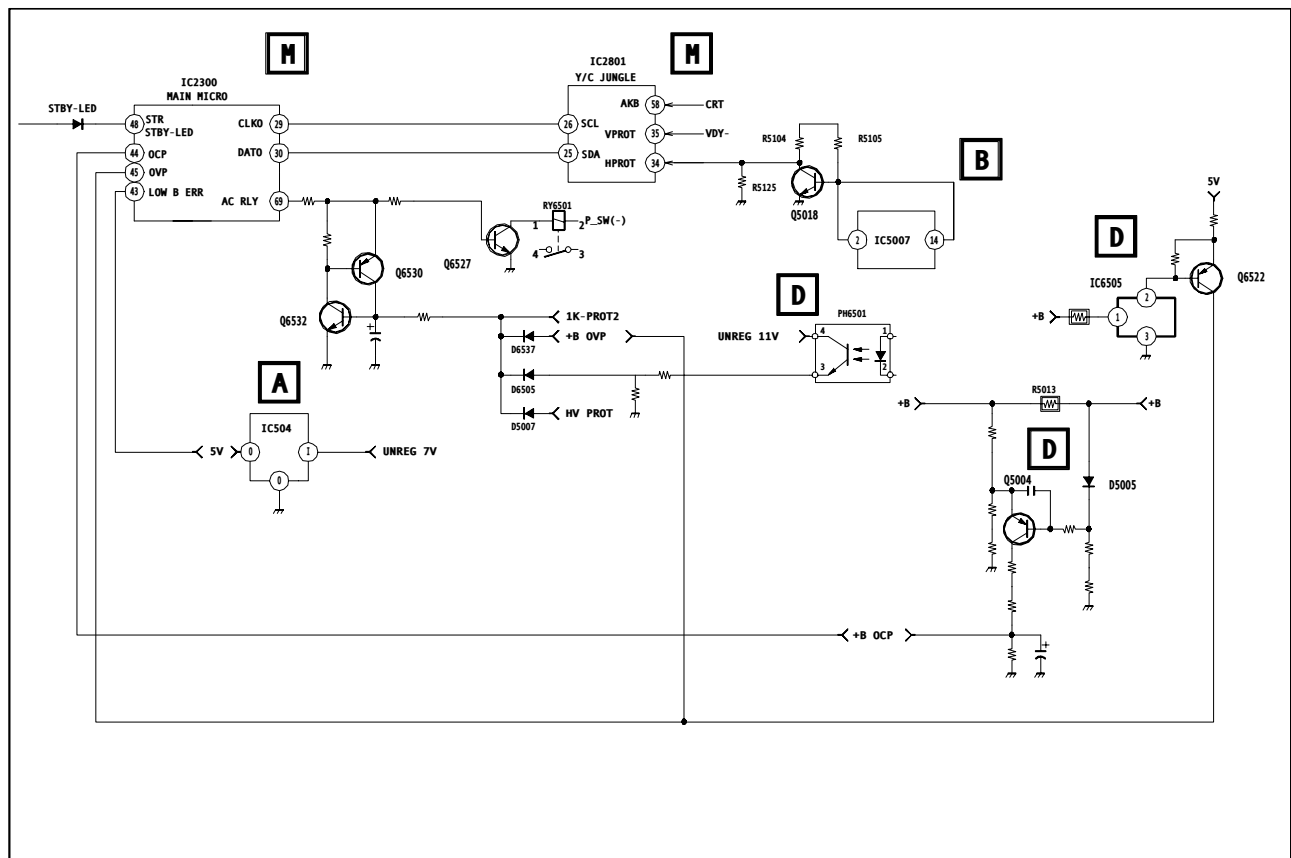

To clear the result display to “0”, press buttons on the Remote Commander sequentially when the diagnostic screen is displayed, as shown below:

Channel **8** ➡ **ENTER**

Quitting the Self-Diagnostic Screen

To quit the entire self-diagnostic screen, turn off the power switch on the Remote Commander or the main unit.

Self-Diagnostic Circuit

+B overcurrent (OCP)

Occurs when excessive current flows through R5013. The increase in voltage across R5013 causes the output of Q5004 to go high, and this high signal goes to the micro.

+B overvoltage (OVP)

IC6505 detects +B OVP condition and turns on Q6522. This sends a high signal to the micro and also shuts down the AC relay.

V-STOP

Occurs when an absence of the vertical deflection pulse is detected by pin 24 of IC2801 (B Board). Power supply will shut down when waveform interval exceeds 2 seconds.

White Balance Failure

If the RGB levels* do not balance within 2 seconds after the power is turned on, this error will be detected by IC2801. TV will stay on, but there will be no picture.

*(Refers to the RGB levels of the AKB detection Ref pulse that detects 1K).

Low B OCP/OVP

Occurs when set 5V is out.

Horizontal Deflection Stopped

Occurs when either:

- 1) a +B overcurrent is detected (IC5007), or
- 2) overheating is detected (Thermistor TH5002).

SECTION 1: DISASSEMBLY

1-1. REAR COVER REMOVAL

1-2. CHASSIS ASSEMBLY REMOVAL

- ① Lift lever up on the right and left sides of the chassis bracket and gently pull the chassis assembly away from the bezel.
- ② Pull up and rotate both the A and D Boards in order to service the unit.

1-3. SERVICE POSITION

- ① **CAUTION!** - Heat sink on IC5004 is -15V. Care must be taken not to allow heat sink to touch any other components.
- ② Lift lever up on the right and left sides of the chassis bracket and gently pull the chassis assembly away from the bezel.
- ③ Pull up and rotate both the A and D Boards in order to service the unit.
- ④ When plugging in connector from HM Board to B Board at CN3603 insure two brown wires are facing upward towards neck assembly.

1-4. PICTURE TUBE REMOVAL

WARNING: BEFORE REMOVING THE ANODE CAP

High voltage remains in the CRT even after the power is disconnected. To avoid electric shock, discharge CRT before attempting to remove the anode cap. Short between anode and CRT coated earth ground strap.

1. Discharge the anode of the CRT and remove the anode cap.
2. Unplug all interconnecting leads from the deflection yoke, neck assembly, degaussing coils and CRT grounding strap.
3. Remove the Sub-Woofer Assemblies.
4. Remove the CX Board from the CRT.
5. Remove the chassis assembly.
6. Loosen the neck assembly fixing screw and remove.
7. Loosen the deflection yoke fixing screw and remove.
8. Place the set with the CRT face down on a cushion and remove the degaussing coil holders.
9. Remove the degaussing coils.
10. Remove the CRT grounding strap and spring tension devices.
11. Unscrew the four CRT fixing screws [located on each CRT corner] and remove the CRT [Take care not to handle the CRT by the neck].

ANODE CAP REMOVAL PROCEDURE

WARNING: High voltage remains in the CRT even after the power is disconnected. To avoid electric shock, discharge CRT before attempting to remove the anode cap. After removing the anode cap, short circuit to either the metal chassis, CRT shield, or carbon painted on the CRT.

NOTE: After removing the anode cap, short circuit the anode of the picture tube and the anode cap to either the metal chassis, CRT shield or carbon painted on the CRT.

REMOVAL PROCEDURES

Turn up one side of the rubber cap in the direction indicated by arrow a .

Use your thumb to pull the rubber cap firmly in the direction indicated by arrow b .

When one side of the rubber cap separates from the anode button, the anode cap can be removed by turning the rubber cap and pulling it in the direction of arrow c .

HOW TO HANDLE AN ANODE CAP

1. Do not use sharp objects which may cause damage to the surface of the anode cap.
2. To avoid damaging the anode cap, do not squeeze the rubber covering too hard. A material fitting called a shatter-hook terminal is built into the rubber.
3. Do not force turn the foot of the rubber cover. This may cause the shatter-hook terminal to protrude and damage the rubber.

SECTION 2: SET-UP ADJUSTMENTS

The following adjustments should be made when a complete realignment is required or a new picture tube is installed.

These adjustments should be performed with rated power supply voltage unless otherwise noted.

The controls and switch should be set as follows unless otherwise noted:

VIDEO MODE: STANDARD (RESET)

Perform the adjustments in order as follows:

1. Beam Landing
2. Convergence
3. Focus
4. Screen (G2)
5. White Balance

Test Equipment Required:

1. Color Bar Pattern Generator
2. Degausser
3. DC Power Supply
4. Digital Multimeter

2-1. BEAM LANDING

Preparation:

- Use cross hatch signal to rough adjust focus, G2 and then input a white pattern signal.
- Face the picture tube in an East or West direction to reduce the influence of geomagnetism.
- Confirm data in service mode to match with CRT screen size.
 - CXA2170D-4
 - CXA8070 (Should be set to default)
 - VCEN, VPIN, HTPZ, PPHA, VANG, LANG, VBOW, LBOW (Should be set to default value).

NOTE: Do not use the hand degausser; it magnetizes the CRT .

1. Input white pattern from pattern generator. Set the PICTURE control to maximum, and the BRIGHTNESS control to standard.
2. Loosen the deflection yoke mounting screw, and set the purity control to the center as shown below:

3. Input a green pattern from the pattern generator.
4. Move the deflection yoke backwards, (See Figure 1) and adjust with the purity control so that green is in the center and red and blue are even on both sides.

5. Move the deflection yoke forward, and adjust so that the entire screen becomes green.

Figure 1

6. Switch over the raster signal to red and blue and confirm the condition.
7. When the position of the deflection yoke is determined, tighten it with the deflection yoke mounting screw.
8. If landing at the corner is not right, adjust it by using the disk magnets.

2-2. V-PIN AND V-CEN ADJUSTMENT

Preparation:

- Input a cross hatch pattern signal.
- Set Video Mode to: Standard (Reset)
- For all 4X3 CRT, VPIN data has separate register for full and V-compress. Adjust both modes if needed.

1. Adjust service mode CXA2170D-1 05 V-CEN so that the top pin and bottom pin are symmetrical from top to bottom.
2. Adjust service mode CXA2170D-1 06 V-PIN so that the top pin and bottom pin are symmetrical from top to bottom.
3. Horizontal lines should be straight from left to right. Check landing for side effect.

2-3. CONVERGENCE

Preparation:

- Set the CONTRAST and BRIGHTNESS control to standard (reset).
- Input a cross hatch pattern signal.

2-3.1. VERTICAL AND HORIZONTAL STATIC CONVERGENCE

1. Disconnect the dynamic convergence before adjusting static convergence (CN903), except for minor touch-up.
2. Adjust H-STAT convergence, RV9001, to converge red, green, and blue dots in the center of the screen.
3. Connect dynamic convergence back.
4. Adjust V. STAT magnet to converge red, green and blue dots in the center of the screen.

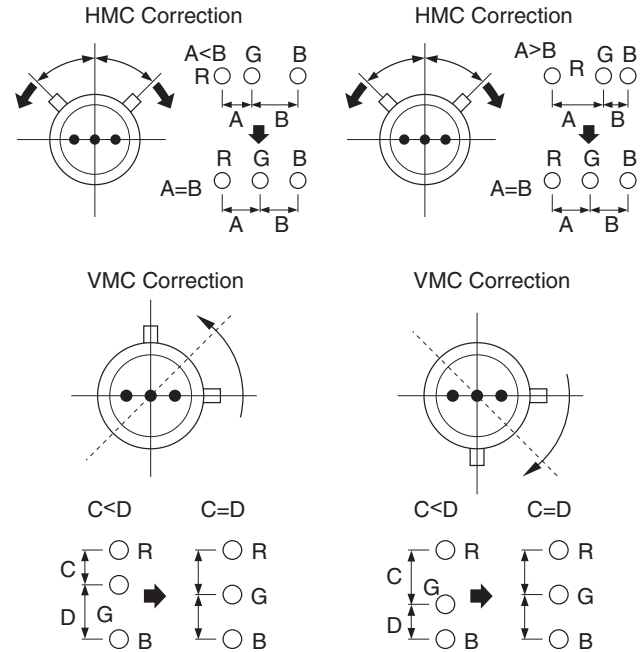

5. Tilt the V-STAT magnet and adjust static convergence to open or close the V-STAT magnet.

2-3.2. OPERATION OF BMC (HEXAPOLE) MAGNET

The respective dot positions result from moving each magnet interact. Perform the following adjustments while tracking.

1. Use the BMC tabs to adjust the red, green and blue dots so that they line up at the center of the screen (move the dots in a horizontal direction).

2-3.3. TLH PLATE ADJUSTMENT

Preparation:

- Input a cross hatch pattern signal.
- Adjust unbalanced horizontal convergence of red and blue dots by adjusting the TLH Plate on the deflection yoke.

1. Adjust XCV core to balance X axis.
2. Adjust the vertical red and blue convergence with V.TILT (TLV VR).

Note: Perform adjustments while tracking Item 1.

2-3.4. SCREEN-CORNER CONVERGENCE

Preparation:

- Input a cross hatch pattern signal.

- Affix a permalloy assembly corresponding to the misconverged areas.

2-3.5. DYNAMIC CONVERGENCE ADJUSTMENTS

- Set dynamic convergence using the following service mode adjustment data.
- Only H-component can be corrected, for vertical component use permalloy to compensate.
- After adjusting the following parameter, write data into NVM
[MUTING] + [ENTER] then copy for 1080i CPY2
(D Conv Item 13 - Change data to 1 then write.)

Output signal format		480P/560i	480P/560i	480P/560i	1080i	1080i	480P/560i

11. LLMB (Left Lower Middle BOW)

12. CADJ Fix 29

2-4. FOCUS ADJUSTMENT

Confirm neck assembly Z axis position. (See Figure 1)

1. Input a dot signal.
2. Set Video Mode to STANDARD.
3. Adjust focus VR clockwise (DE-Focus) to confirm that the dot's shape is centered. (Figure 2 & 3) Confirm neck assembly rotation by W Board position. W Board should be level $\pm 1^\circ$. Adjust as necessary to balance dot shape along center horizontal line, then refocus.
4. Input a HD monoscope signal.
5. Confirm center focus with focus VR.

Figure 1

Figure 2

DOT SHAPE:

Figure 3

2-4.1. DYNAMIC FOCUS/DYNAMIC QUADRA-POLE DATA

Normally, no adjustments are necessary for these systems. If for some reason the data is lost, use the following data:

Write the data from any non-vertically compressed mode, then use the CPY1 function (CXA2170D-4 Item 6) to copy the data to the vertical compressed modes. V-compressed data is identical to non-v-compressed data. Service personnel with a trained eye can adjust the DF or DQP registers to adjust DF phase (Item 7) or DQP phase (Item 8), respectively, to balance left and right focus. Refrain from adjusting more than 5 steps from table data below. Further adjustment indicates a circuit problem -- troubleshoot to cause. Be sure that Neck Assembly is in the proper location

(See Section 2-4 Figure 1 - before changing DF/DQP data or troubleshooting circuit when DF/DQP is suspect.)

NOTE: Changing neck assembly position will affect corner convergence.

2-5. SCREEN (G2)

1. Input composite white field into Video 1.
2. Set to service mode and adjust as follows:

(Fig 1)	Operation procedure	Standards	Notes
CXA2170P-2 PICO 1 → 0	<ol style="list-style-type: none"> 1) In Full mode, apply changes in Fig 1 2) Mount G2 adjustment jig. Adjust Cathode voltage if the standard is not met. Standard varies by CRT size. 3) Adjust G2 by Flyback transformer (T8001). 4) Return data changes in 1) to original condition 	$170 \pm 5 (V_{DC})$ $175 \pm 5 (V_{DC})$	34RSN, 36RV2, 38RSN

2-6. PICTURE QUALITY ADJUSTMENTS

Preparation:

- Set PRO MODE (Reset).

1. Input signal (480i Composite):
 - Color Bar Video 75 IRE (White) 75% modulation 7.5% Set-up.
 - Color Bar RF 75 IRE (White) 75% modulation 7.5% Set-up.

2-6.1. VIDEO INPUT - SUB CONTRAST ADJUSTMENT

Preparation:

- Input a Color Bar signal to VIDEO 1 (75 IRE 75%).
- Set picture mode: Single (PRO MODE Reset).
- Picture: Max

1. Set to Service Mode and adjust as follows:

2150P-2

NO.	Name	Control Function	Avg. Data
01	RGBS	R ON	4

2. Connect oscilloscope to Pin 1 of CN9001 (R.DRV) on the C Board.
3. Adjust contrast according to the service mode item: SPIO.

2103-2

NO.	Name	Control Function
02	SCON	SUB-CONT

$$(32HS/34DRC) = 1.92 \pm 0.05 V_{pp}$$

$$(34HS) = 1.67 \pm 0.05 V_{pp}$$

$$(36HS/38DRC) = 2.00 \pm 0.05 V_{pp}$$

4. Write data from Step 3 above, into memory.

2-6.2. VIDEO INPUT - SUB HUE/SUB COLOR ADJUSTMENT

Preparation:

- Input a Color Bar signal to VIDEO 1 (75 IRE 75%).
- Set picture mode: Single (PRO MODE Reset).
- Picture: Max

1. Set to Service Mode and adjust as follows:

2150P-2

NO.	Name	Control Function	Avg. Data
01	RGBS	R ON	7

2. Connect an oscilloscope to Pin 5 of CN9001 (B. DRV) on the C Board.
3. Adjust color according to Service Mode for SCLO.

4. Adjust color according to Service Mode for SHUO.

2103-1

NO.	Name	Control Function
03	SCOL	SUB-COL
04	SHUE	SUB-HUE

COLOR: $VB1 \leq VB4$ ($\approx 20 \pm 40$ mV)

HUE: $VB2 \leq VB3$ ($\approx 20 \pm 40$ mV)

7. Write data into memory.

2-6.3. RF INPUT - TWO PICTURE SUB CONTRAST ADJUSTMENT

Preparation:

- Input a Color Bar signal to RF (75 IRE 75%).
- Set picture mode: P&P (PRO MODE).
- Picture: Max

1. Set to Service Mode and adjust as follows:

2170P-4

NO.	Name	Control Function	Avg. Data
28	SPOF	SMALL PICTURE OFFSET	0

2170P-2

NO.	Name	Control Function	Avg. Data
01	RGBS	R ON	4

2. Connect an oscilloscope to Pin 1 of CN9001 (R. DRV) on the C Board.
 3. Adjust MAIN (left) side contrast according to service mode for SCON.

2103-1

NO.	Name	Control Function
02	SCON	SUB-CONT

4. Adjust SUB (right) side contrast according to Service Mode for SCON.

2103-2

NO.	Name	Control Function
02	SCON	SUB-CONT

5. Write data from Steps 3 - 4 above, into memory.
 6. Set Service Mode

2170P-4

NO.	Name	Control Function	Avg. Data
28	SPOF	SMALL PICTURE OFFSET	13

2-6.4. RF INPUT - SUB HUE/SUB COLOR ADJUSTMENT

Preparation:

- Input a Color Bar signal to RF (75 IRE 75%).
- Set picture mode: P&P (PRO MODE Reset).
- Picture: Max

1. Set to Service Mode and adjust as follows:

2150P-4

NO.	Name	Control Function	Avg. Data
01	RGBS	R ON	7

2. Connect an oscilloscope to pin 5 of CN9001 (B. DRV) on the C Board.
 3. Adjust MAIN (left) side color according to Service Mode for SCOL.
 4. Adjust MAIN (left) side color according to Service Mode for SHUE.

2103-1

NO.	Name	Control Function
03	SCOL	SUB COLOR
04	SHUE	SUB HUE

5. Adjust SUB (right) side color according to Service Mode for SCOL.
6. Adjust SUB (right) side color according to Service Mode for SHUE.

2103-2

NO.	Name	Control Function
03	SCOL	SUB COLOR
04	SHUE	SUB HUE

COLOR: $VB1 \leq VB4$ ($=20 \pm 40$ mV)

HUE: $VB2 \leq VB3$ ($=20 \pm 40$ mV)

7. Write data into memory.

2-7. WHITE BALANCE (CRT) AND SUB BRIGHT ADJUSTMENT

Preparation

- Input an all white 480I (15.734 KHz) signal into the VIDEO 1 input terminal to perform the White Balance (highlight, cut-off) adjustments. The parameters to adjust are in the CXA2170P in Service Mode.

WHITE BALANCE ADJUSTMENT PROCEDURE (Composite White Field signal into Video 1)						
Specification	Highlight/Cutoff 9300K + 8MPCD (R/G 1.000, B/G 1.000)		WB701 Preset		R/G	B/G
				34RSN	0.589	0.883
				36RV2	0.745	0.905
				38RSN	0.679	0.872
Condition	Picture Mode: Single (Full) Picture Setting: Pro Color Temp: Neutral Picture: 63 write to 86h:01h:FFh Color: 0 write to 86h:03h:00h		Adjustment Registers (Service Mode)	RDRV (fixed)**		2170P-1-06
				GDRV		2170P-1-07
				BDRV		2170P-1-08
				RCUT (fixed)**		2170P-1-09
				GCUT		2170P-1-10
				BCUT		2170P-1-11
**Data will differ by model						

2-7.1. COLOR OFFSET ADJUSTMENT PROCEDURE

Preparation:

- Input an all white (30 IRE) signal to the specified input.
- Adjust the white balance using the specified registers.

VIDEO 1**CXA2103-M**

NO.	Name	Control Function
20	CBO1	CB OFFSET
21	CRO1	CR OFFSET

VIDEO 5**CXA2103-M**

NO.	Name	Control Function
20	CBO1	CB OFFSET
21	CRO1	CR OFFSET

VIDEO 7 - DVI**CXA2103-M**

NO.	Name	Control Function
22	CBO2	CB01 (FROM VIDEO 5) - 5
23	CRO2	CR01 (FROM VIDEO 5) -4

2-8. H RASTER CENTER ADJUSTMENT

Preparation:

- Input a monoscope signal.
- Set to NTSC (DRC) mode.

- Set to Service Mode and adjust as follows:

CXA2150P-2

NO.	Name	Control Function	Avg. Data
06	AGNG	AGING 1, AGING 2	2

CXA2150D-2

NO.	Name	Control Function	Avg. Data
02	HSIZ	Horiz Size	45

CXA2150D-3

NO.	Name	Control Function	Avg. Data
00	HBLK	Blanking Enable	0

- Reduce HSIZ to see sides of raster.
- Adjust H-Center with CXA2170D-2.
- Adjust to the best screen position with H-CENT and write data.

5. Restore aging, HSIZ and HBLK to original condition.

Raster Edge Equal:

2-9. PICTURE DISTORTION ADJUSTMENTS

2-9.1. NTSC (DRC) FULL MODE ADJUSTMENT

1. Face the picture tube in an east-west direction. (For best condition.)
2. Complete V-PIN and V-CEN adjustments first (A2170-D1 06 V-PIN, A2170-D1 05 V-CEN).
3. Input a monoscope and crosshatch signal. Adjust the picture distortion with the following service parameters to balance the best condition for these two signals.

NOTE: Make sure that the picture size is within specs. Vertical size is 11.8 ± 0.1 sq. and horizontal size is 15.8 ± 0.1 sq.

4. Write data into memory before changing modes.

CXA2170D-1

- Item 0. VPOS (V-POSITION)

- Item 1. VSIZ (V-SIZE)

- Item 3. VLIN (V-LINE)

- Item 4. VSCO (VS-COR)

- Item 9. HTPZ (H-TRAPEZOID)

CXA2170D-2

- Item 1. HPOS (H-POSITION)

- Item 2. HSIZ (H-SIZE)

- Item 5. PIN (PIN AMP)

- Item 7. UCP (UP COR PIN COR)

- Item 8. LCP (LOW CO PIN COR)

- Item 14. PPHA (PIN PHASE)

- Item 15. VANG (AFC-ANGLE)

- Item 16. LANG (L-ANGLE)

- Item 17. VBOW (AFC-BOW)

- Item 18. LBOW (L-BOW)

2-9.2. 1080i HD MODE ADJUSTMENT

1. Input a 1080i cross-hatch signal and an HD monoscope signal that contains overscan markers.
2. Adjust the raster position per Section 2-8., only if this procedure was not performed for full mode.
3. Adjust the geometry similar to Full DRC mode. Vertical size is 11.7 ± 0.1 sq. and horizontal size is 15.6 ± 0.1 sq., if monoscope signal is available. Otherwise, set the Vertical size to $91.0 \pm 0.6\%$ scan and Horizontal size as $91.0 \pm 0.6\%$ scan.
4. Use the following register to adjust the horizontal parameter:

A2150-D2	01	HPOS
----------	----	------

NOTE: If necessary, touch up the geometry using the data register listed above for Full mode. Check NTSC full mode for side effect and balance.

5. Write the data into memory before changing modes.

2-9.3. VERTICAL COMPRESSED MODE CHECK AND CONFIRMATION (FOR 4X3 CRT ONLY)

1. Input a monoscope and crosshatch signal.
2. Check vertical compressed mode.
3. Adjust VPIN if needed.

2-9.4. TWIN MODE/FAVORITE/INDEX/ NORMAL MODE GEOMETRY CONFIRMATION

TWIN mode and FAVORITE mode use the FULL mode adjustment data. The key point for TWIN mode adjustment is the blue border appearance. The left border on the left picture should not be visible when the left picture is selected. Similarly, the right border on the right picture should not be visible when the right picture is selected. Balance the HPOS or HSIZ data for FULL and TWIN mode.

For INDEX mode, however, no clipping of the picture edge should be visible for the small sampled pictures on the right side. Adjust HSIZ/ HPOS to balance FULL and INDEX mode for this. Avoid displaying the edge of the raster in FULL or FAVORITE mode.

SECTION 3: SAFETY RELATED ADJUSTMENTS

3-1. PREPARATION BEFORE CONFIRMATION

Standard 135.3 ± 1 VAC
Check Condition:
 AC input voltage: 120 (± 2) VAC
Note: If using a stabilized power supply, make sure that the distortion factor is 3% or less.
Setting Mode: Full mode
Signal Input: Cross-hatch of NTSC
Initial Setting: Standard Reset condition
Confirm Point: Across CN5509 PIN 9 for B+ of D Board

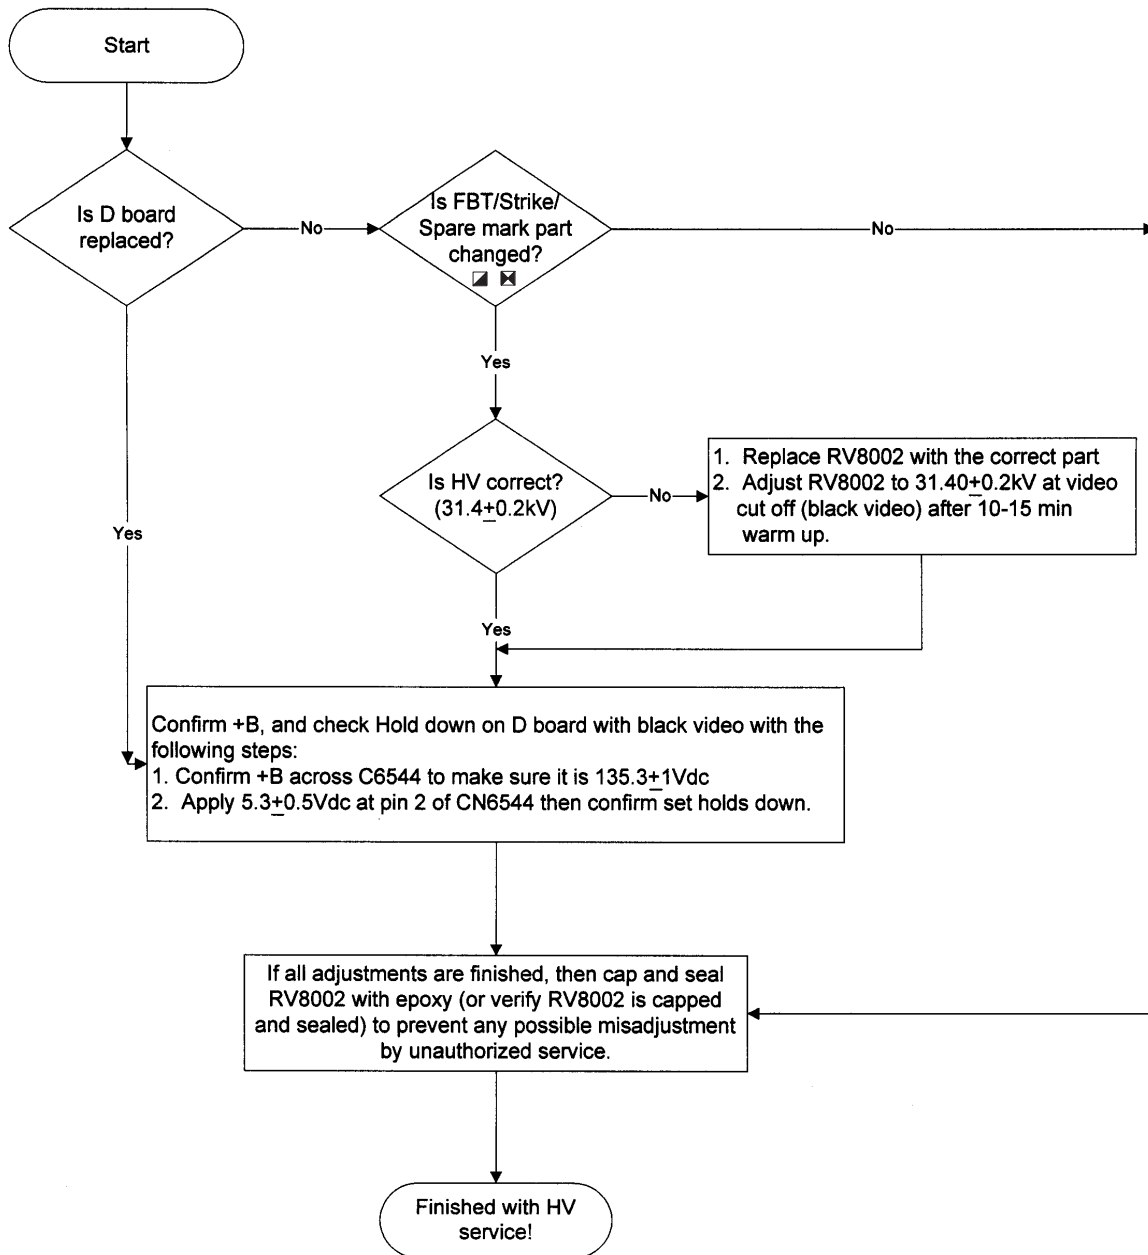

3-1.1 HOLD-DOWN OPERATION
CONFIRMATION

- 1. Using an external DC power supply, apply 5.3 ± 0.5 Vdc between Pin 2 of CN507 (jig connector) and ground (Pin 8); confirm set goes to hold-down (main power relay click).
- 2. Remove the external DC power supply.

3-2. B+ MAX CONFIRMATION

Standard 135.3 ± 1 VAC
Check Condition:
 AC input voltage: 120 (± 2) VAC
Note: If using a stabilized power supply, make sure that the distortion factor is 3% or less.
Setting Mode: Full mode
Signal Input: Cross-hatch of NTSC
Initial Setting: Standard Reset condition
Confirm Point: Across CN5509 PIN 9 for B+ of D Board

3-3. HV SERVICE FLOWCHART

HV Serviceman flow chart

SECTION 4: CIRCUIT ADJUSTMENTS

ELECTRICAL ADJUSTMENTS BY REMOTE COMMANDER

Use the Remote Commander (RM-Y190, RM-Y191) to perform the circuit adjustments in this section.

Test Equipment Required: 1. Pattern generator 2. Frequency counter 3. Digital multimeter 4. Audio oscillator

4-1. SETTING SERVICE ADJUSTMENT MODE

- Standby mode (Power off).
- Press the following buttons on the remote commander within a second of each other:

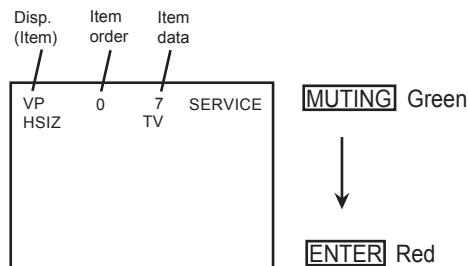

DISPLAY → Channel **5** → Sound Volume **+** → Power

4-1.1. SERVICE ADJUSTMENT MODE IN

- The CRT displays the item being adjusted.
- Press **1** or **2** on the Remote Commander to select the item.
- Press **3** or **6** on the Remote Commander to change the data.
- Press **MUTING** then **ENTER** to write into memory.

4-1.2. SERVICE ADJUSTMENT MODE MEMORY

- Press **MUTING** then **ENTER** on the Remote Commander to initialize.

- DO NOT turn off set until **SERVICE** appears.

4-1.3. READING THE MEMORY

- Enter into Service Mode.
- Press **0** on the Remote Commander.
- Press **ENTER** to read memory.

4-1.4. ADJUSTING THE PICTURE

- Enter into Service Mode
- Press **2** or **5** on the remote to select the device item.
- Press **1** or **4** on the remote to select an item.
- Press **3** or **6** on the remote to change the data.
- Press **MUTING** then **ENTER** to write into memory.

4-1.5. RESETTING THE DATA

Note: Be careful when using the remote! It will clear and re-initialize ALL NVM data including deflection adjustment data if not reset properly as follows:

4-1.6. RESETTING THE MID NVM DATA

- Enter into Service Mode.
- Press **7**, then **JUMP**, and then press **ENTER** on the remote.

4-1.7. RESETTING THE SYSTEM NVM DATA

- Enter into Service Mode.
- Press **7**, then **9**, and then press **ENTER** on the remote.

4-1.8. COPY FUNCTION

How to use copy function for DA4 Chassis:

- After writing your adjusted data into NVM **MUTING** then **ENTER**, copy can be made by changing copy data from **0** to **1** then **MUTING**, **ENTER** again.

WARNING: DO NOT copy data before writing your corrected data in NVM. If data is copied before writing corrected data, old data will be copied.

- CPY1: DF/DQP DATA (CXA2170D-4 Item 6)
- CPY2: CONVERGENCE DATA (D-CONV Item 13)

4-2. MEMORY WRITE CONFIRMATION METHOD

1. After adjustment, pull out the plug from the AC outlet, then replace the plug in the AC outlet again.
2. Turn the power switch ON and set to Service Mode.
3. Call the adjusted items again to confirm they were adjusted.

4-3. REMOTE ADJUSTMENT BUTTONS AND INDICATORS

4-4. SERVICE DATA LISTS

SECTION 5: DIAGRAMS

5-1. CIRCUIT BOARDS LOCATION

The components identified by shading and \triangle symbol are critical for safety. Replace only with part number specified.

The symbol  indicates a fast operating fuse and is displayed on the component side of the board. Replace only with fuse of the same rating as marked.

Les composants identifiés par un trame et une marque \triangle sont critiques pour la sécurité. Ne les remplacer que par une pièce portant le numéro spécifié.

Le symbole  indique une fusible à action rapide. Doit être remplacé par une fusible de même valeur, comme marqué.

The components identified by  in this basic schematic diagram have been carefully factory-selected for each set in order to satisfy regulations regarding X-ray radiation. Should replacement be necessary, replace only with the value originally used.

When replacing components identified by , make the necessary adjustments as indicated. If the results do not meet the specified value, change the component identified by  and repeat the adjustment until the specified value is achieved.

When replacing the parts listed in the table below, it is important to perform the related adjustments.

Part Replaced ()	Adjustment ()
D BOARD: IC6503, IC8001, IC8005, IC8004, IC8104, D8022, R8016, R8079, R8046, R8052, R8014, R8015, R8017, R8078, R8072, R8082, R8091, R8095	HV ADJUST RV8002

5-2. PRINTED WIRING BOARDS AND SCHEMATIC DIAGRAMS INFORMATION

All capacitors are in μF unless otherwise noted. pF : μF 50VV or less are not indicated except for electrolytics and tantalums.

All electrolytics are in 50V unless otherwise specified.

All resistors are in ohms. $\text{k}\Omega=1000\Omega$, $\text{M}\Omega=1000\text{k}\Omega$

Indication of resistance, which does not have one for rating electrical power, is as follows: Pitch : 5mm

Rating electrical power : $\frac{1}{4}\text{W}$

$\frac{1}{4}\text{W}$ in resistance, $\frac{1}{10}\text{W}$ and $\frac{1}{16}\text{W}$ in chip resistance.

 : nonflammable resistor

 : fusible resistor

\triangle : internal component

 : panel designation and adjustment for repair

\perp : earth ground

 : earth-chassis

All variable and adjustable resistors have characteristic curve B, unless otherwise noted.

Readings are taken with a color-bar signal input.

Readings are taken with a 10M Ω digital multimeter.

Voltages are DC with respect to ground unless otherwise noted.

Voltage variations may be noted due to normal production tolerances.

All voltages are in V.

S : Measurement impossibility.

 : B+line.

 : B-line. (Actual measured value may be different).

 : signal path. (RF)

Circled numbers are waveform references.

The diagram illustrates the Hi-Fi system architecture, showing the flow of signals from various inputs through processing blocks to the final outputs. The system is organized into several functional blocks:

- Inputs:** Video2, Video1, Video3, Video4, Video7, Monitor, Video5, Video6, Audio, ANT SW, Video7, Video2, Video1, Video3, Video4, Video7, Monitor, Video5, Video6, Audio, ANT SW.
- Processing Blocks:**
 - Video Processor (M):** Includes Video7, Video2, Video1, Video3, Video4, Video7, Monitor, Video5, Video6, Audio, ANT SW, Video7, Video2, Video1, Video3, Video4, Video7, Monitor, Video5, Video6, Audio, ANT SW.
 - Audio Processor (U):** Includes Video7, Video2, Video1, Video3, Video4, Video7, Monitor, Video5, Video6, Audio, ANT SW, Video7, Video2, Video1, Video3, Video4, Video7, Monitor, Video5, Video6, Audio, ANT SW.
 - Microcontroller (B):** Includes Video7, Video2, Video1, Video3, Video4, Video7, Monitor, Video5, Video6, Audio, ANT SW, Video7, Video2, Video1, Video3, Video4, Video7, Monitor, Video5, Video6, Audio, ANT SW.
 - Display (D):** Includes Video7, Video2, Video1, Video3, Video4, Video7, Monitor, Video5, Video6, Audio, ANT SW, Video7, Video2, Video1, Video3, Video4, Video7, Monitor, Video5, Video6, Audio, ANT SW.
- Outputs:** Speaker, Woofer, Display (D), Video7, Video2, Video1, Video3, Video4, Video7, Monitor, Video5, Video6, Audio, ANT SW.

The diagram shows a complex interconnection of these blocks, with signals flowing from the inputs through the processing blocks to the final outputs. The system is designed to provide high-fidelity audio and video reproduction.

COMPONENT SIDE

The diagram shows the rear panel of the Sony CCD-800 camera with the following components:

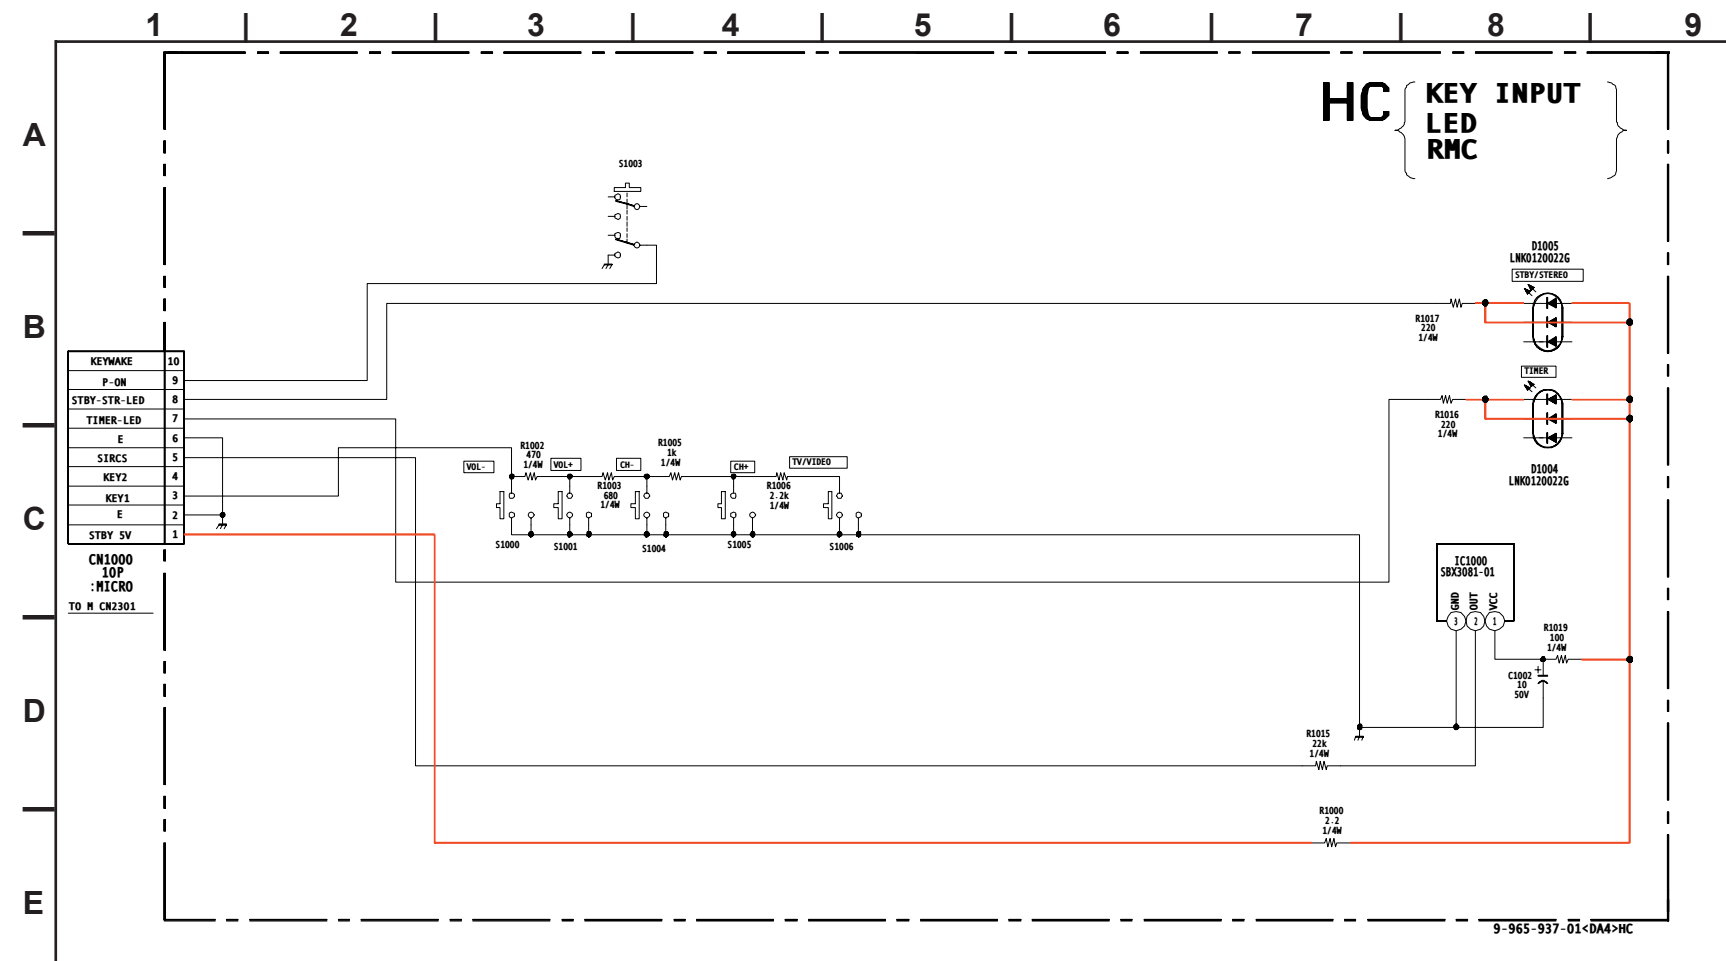

- VIDEO 2 INPUT**: A label above two BNC connectors labeled J61 and J62.
- B**: A circular connector labeled "B".
- 1-684-696-14 (1-721-187-14)**: A printed part number.
- VIV**, **GND**, **V2C**, **GND**, **V2V**, **AC**, **V25W**: Labels for a vertical multi-pin connector on the left.
- TO U**: A label at the bottom left pointing to a terminal.
- CN1100**: A label for a component near the bottom left.
- SONY**: The brand name oriented vertically in the center.
- C1103**, **C1102**, **C1101**, **C1100**: Capacitor labels.
- 0011F**: A label next to a horizontal multi-pin connector on the right.
- L**, **R**, **Y**: Labels for video output terminals on the far right.

All voltages are in V.

SECTION 6: EXPLODED VIEWS

Components not identified by a part number or description are not stocked because they are seldom required for routine service.

The component parts of an assembly are indicated by the reference numbers in the far right column of the parts list and within the dotted lines of the diagram.

* Items marked with an asterisk are not stocked since they are seldom required for routine service. Expect some delay when ordering these components.

NOTE: The components identified by shading and  mark are critical for safety. Replace only with part number specified.

NOTE: Les composants identifiés par un trame et une marque  sont critiques pour la sécurité. Ne les remplacer que par une pièce portant le numéro spécifié.

SECTION 7: ELECTRICAL PARTS LIST

NOTE: The components identified by shading and  mark are critical for safety. Replace only with part number specified.

NOTE: Les composants identifiés par un trame et une marque  sont critiques pour la sécurité. Ne les remplacer que par une pièce portant le numéro spécifié.

The components in this manual identified by the following symbol:  indicate parts that have been carefully factory-selected to satisfy regulations regarding X-ray radiation for each set.

Should replacement be required for one of these components, replace only with the value originally used.

* Items marked with an asterisk are not stocked since they are seldom required for routine service. Expect some delay when ordering these components.

RESISTORS

- All resistors are in ohms
- F : nonflammable
- All variable and adjustable resistors have characteristic curve B, unless otherwise noted.

When ordering parts by reference number, please include the board name.

D

* **A-1300-319-A D BOARD, COMPLETE**
(All except KV-34DRC510(S)/38DRC510(S))

A-1300-538-A D BOARD, COMPLETE
(KV-34DRC510(S)/38DRC510(S) ONLY)

Due to the complexity of this board, performing component level field repairs is not recommended. If service is required, complete board replacement is the preferred repair method.
Data is provided for reference only.

CONTROL DOOR INSTALLATION AND DISASSEMBLY INSTRUCTIONS

FOR MODELS:

KV-32HS510

KV-34DRC510

KV-36HS510

KV-38DRC510

INSTALLATION OF HS DOOR

STEP ①

- INSERT DOOR DAMPER WITH THE DOOR DAMPER FOOT IN THE UP POSITION (SEE ILLUSTR. A-A).
- SECURE WITH A 3X12 SCREW.

INSTALLATION OF HS DOOR

STEP ②

SWING THE DAMPER FOOT TO THE DOWN POSITION.

STEP ③

- ALIGN DOOR HINGES WITH PIVOTS ON BEZNET.
- PUT THE DAMPER FOOT INTO THE DOOR'S HOOK.

STEP ④

B-B

PUSH BOTH DOOR HINGES ONTO THE BEZNET'S DOOR PIVOTS. PUSH DOWN UNTIL YOU CAN HEAR THEM 'CLICK' INTO PLACE.

INSTALLATION OF HS DOOR

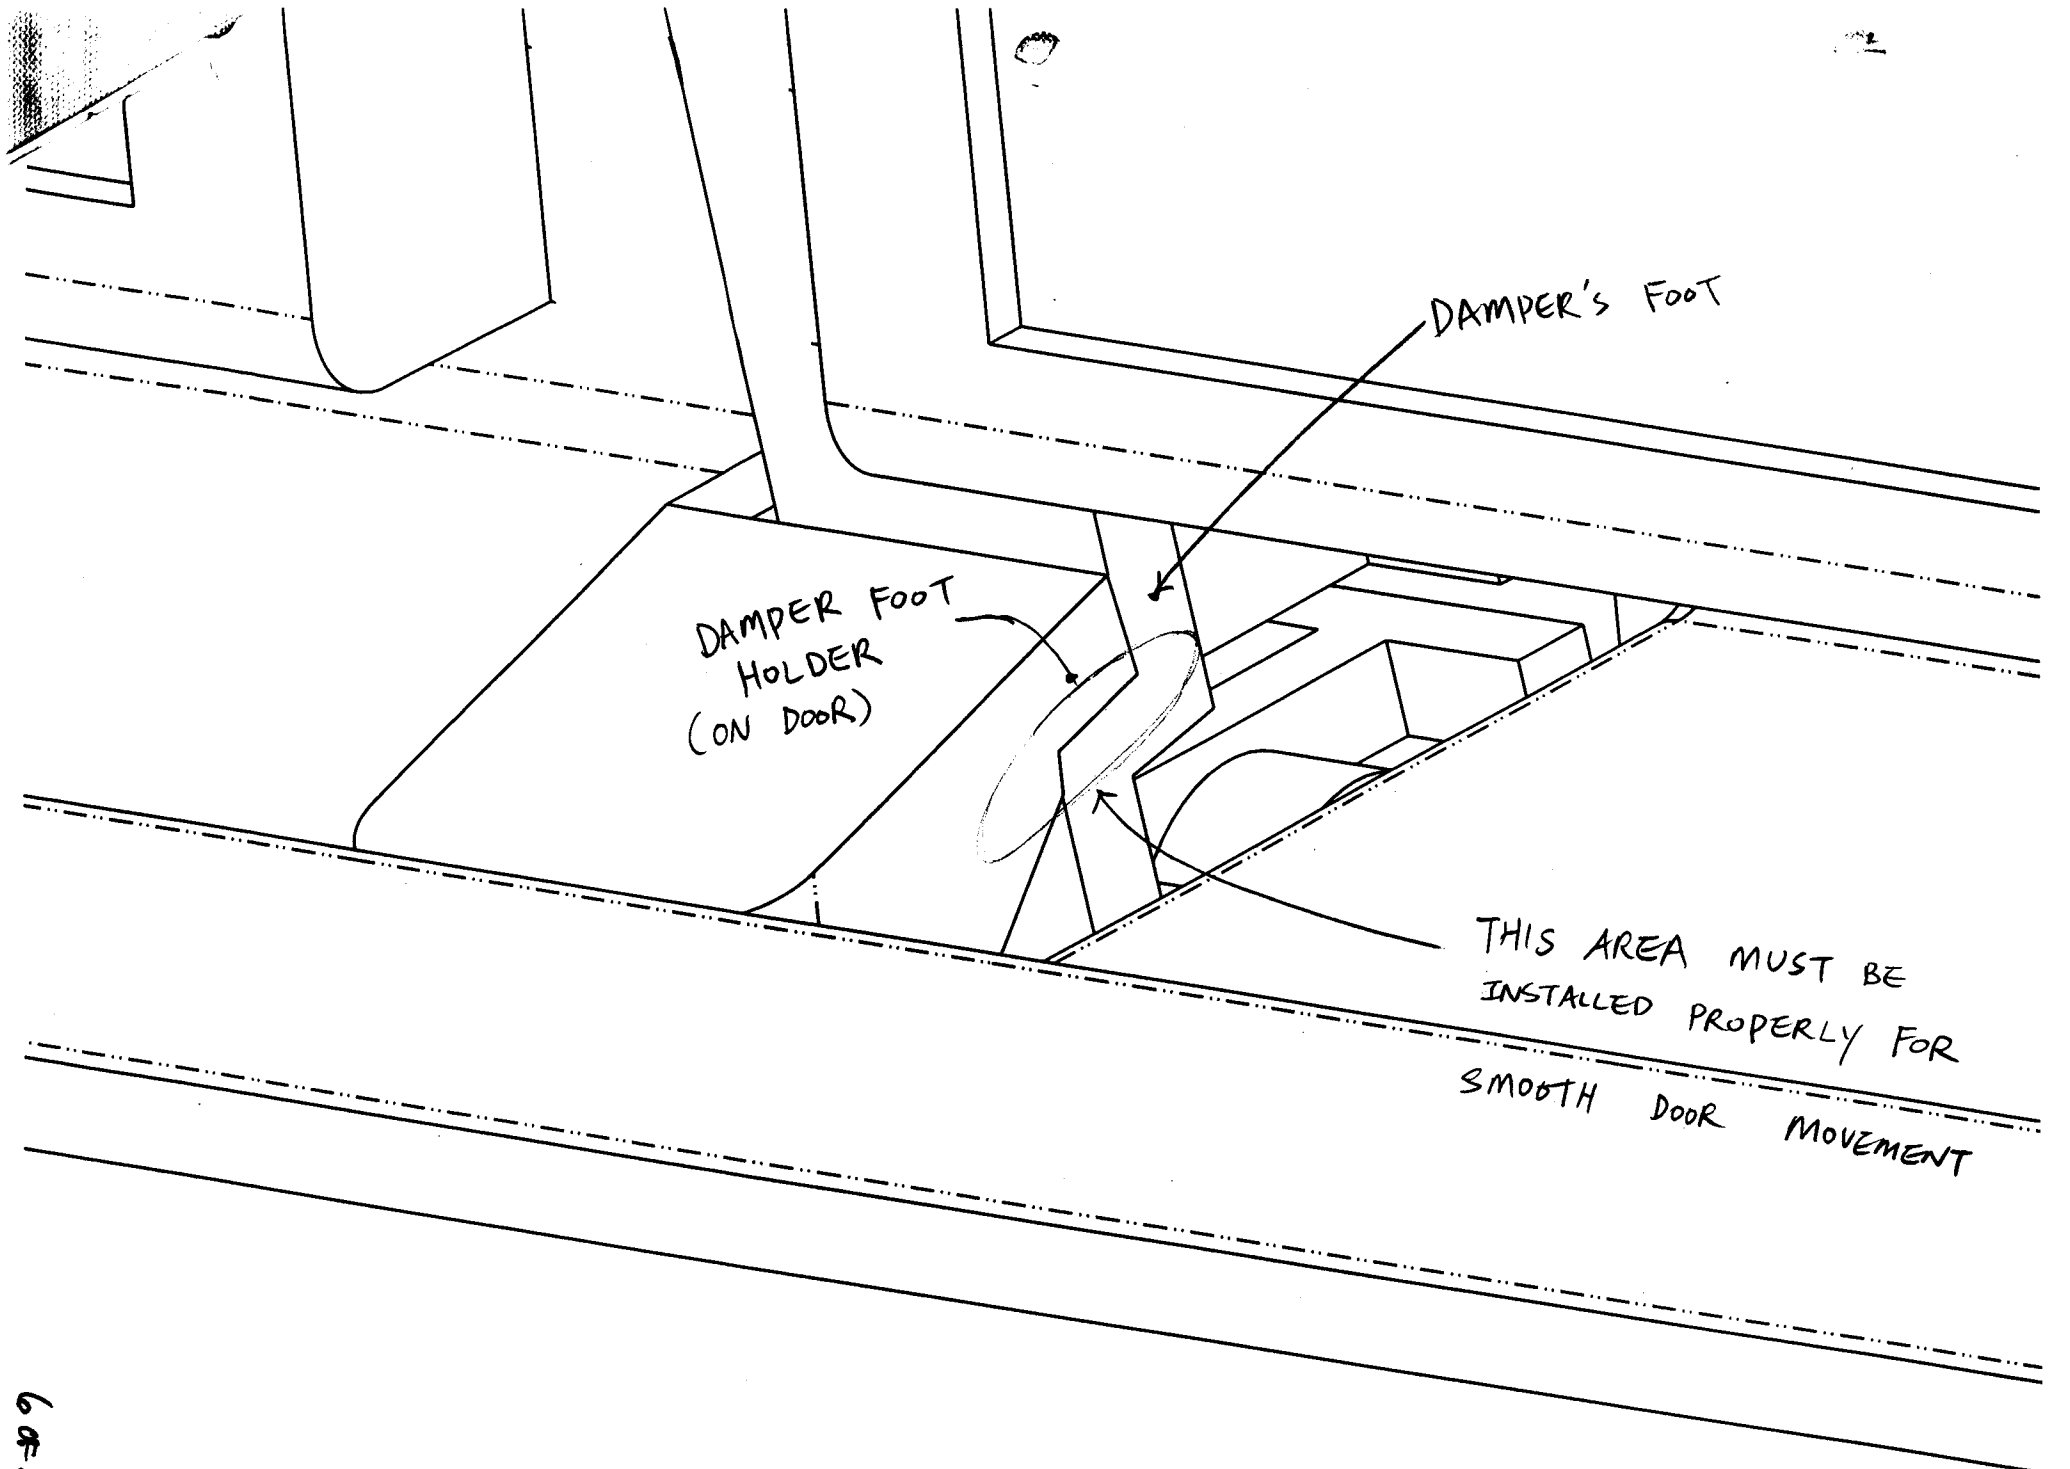

STEP ⑤

TO ENGAGE THE DOOR DAMPER INTO THE DOOR, PUSH FORWARD WHILE PUSHING UP AT THE SAME TIME. DO THIS UNTIL THERE IS A 'CLICK' HEARD FROM THE DAMPER FOOT BEING SEATED INTO THE DOOR.

SEE NEXT PAGE

DAMPER'S FOOT

DAMPER FOOT
HOLDER
(ON DOOR)

THIS AREA MUST BE
INSTALLED PROPERLY FOR
SMOOTH DOOR MOVEMENT

6-4-8

DISASSEMBLY OF HS DOOR

STEP ①

D-D

NOTE C:

WHEN DOOR IS IN THE CLOSED POSITION, PULL AT HATCHED (SEE ABOVE ILLUSTRATION) AREA FORWARD. PULL LIGHTLY UNTIL A 'CLICK' SOUND IS HEARD. THIS WILL MEAN THAT THE DOOR HAS BEEN SEPARATED FROM THE DOOR DAMPER.

DISASSEMBLY OF HS DOOR

STEP ②

- OPEN DOOR.
- PULL DOOR HINGE AREAS FORWARD (AWAY FROM BEZNET) TO RELEASE DOOR.

Setting Up the TV

Overview

This chapter includes illustrated instructions for setting up your TV.

Topic	Page(s)
TV Controls and Connectors	10-13
Basic Connections: Connecting a Cable or Antenna	14-20
Connecting Optional Equipment	
VCR and Cable	22
VCR and Cable Box	24
Two VCRs for Tape Editing	26
Satellite Receiver	28
Satellite Receiver and VCR	30
DVD Player with Component Video Connectors	32
DVD Player with S VIDEO and Audio Connectors	34
Camcorder	35
Audio Receiver	36
Using the CONTROL S Feature	37
Setting Up the Channel List	38

About the AC Power Cord

The AC power cord is attached to the rear of the TV with a hook. Use caution when removing the AC plug from its holder. Gently slide the plug upward to remove it from the hook. Once removed, the AC power plug should automatically disengage from its stored location.

 Do not plug in the AC power cord until you have made all other connections.

TV Controls and Connectors

Front Panel

Item	Description
1 MEMORY STICK	Memory Stick insertion slot. For details, see “Using the Memory Stick Picture Viewer” on page 52.
2 MEMORY STICK LED	When lit, indicates that the Memory Stick is being read. (Do not remove the Memory Stick when the indicator is lit.)
3 S VIDEO VIDEO 2 INPUT	Connects to the S VIDEO OUT jack on your camcorder or other video equipment that has S VIDEO. Provides better picture quality than composite video (4).
4 VIDEO/L(MONO)-AUDIO-R VIDEO 2 INPUT	Connects to the composite A/V output jacks on your camcorder or other video equipment.
5 MENU	Press to display the Menu. Press again to exit from the Menu. For details, see “Using the Menus” on page 63.
6 ↑ ↓ ← →	Press ↑ ↓ ← → to move the on-screen cursor.
7 + SELECT	Press to select the on-screen highlighted item.
8 TV/VIDEO	Press repeatedly to cycle through the video equipment connected to the TV’s video inputs.
9 -VOLUME +	Press to adjust the volume.
10 -CHANNEL+	Press to scan through channels. To scan quickly through channels, press and hold down either CHANNEL button.
11 TIMER LED	When lit, indicates one of the timers is set. When the timer is set, this LED will remain lit even if the TV is turned off. For details, see page 73.
12 STAND BY LED	Blinks when the TV is turned on, then shuts off when the picture is displayed. If the LED blinks continuously, this may indicate the TV needs service (see “Contacting Sony” on page 80).
13 Infrared Receiver (IR)	Receives IR signals from the TV’s remote control.
14 POWER	Press to turn on and off the TV.

Rear Panel

Jack	Description
[1] DVI-HDTV VIDEO AUDIO R/L (VIDEO 7 IN)	Can accommodate a copy-protected digital connection (HDCP*) to other devices (such as digital set-top boxes) that have compatible interfaces. The DVI-HDTV input terminal is compliant with the EIA-861 standard and is not intended for use with personal computers. See the instruction manual that came with your equipment for details about connecting and using it with the TV.
[2] S VIDEO IN 1/3	Connects to the S VIDEO OUT jack of your VCR or other video equipment that has S VIDEO. S VIDEO provides better picture quality than either composite video ([3]) or VHF/UHF ([9]) connections.
[3] VIDEO IN 1/3/4 VIDEO/L(MONO) -AUDIO-R	Connect to the composite A/V output jacks on your VCR or other video component. A fourth component A/V input jack (VIDEO 2) is located on the front panel of the TV. This video connection provides better picture quality than the VHF/UHF ([9]) connection.
[4] MONITOR OUT	Lets you record the program you are watching to a VCR. When two VCRs are connected, you can use the TV as a monitor for tape-to-tape editing (not available with 480p, 720p, or 1080i when the input is set to VIDEO 5-7).
[5] AUDIO OUT (VAR/FIX) L (MONO)/R	Connects to the left and right audio input jacks of your audio or video equipment. You can use these outputs to listen to your TV's audio through your stereo system.
[6] HD/DVD IN 5/6 (1080i/720p/480p/480i)	Connect to your DVD player's or digital set-top box's component video (Y, Pb, Pr) and audio (L/R) jacks. Component video provides the best picture quality (better than [2] , [3] , or [9]).
[7] AUX	Auxiliary RF input that connects to your antenna, CATV cable, or cable box output jack. This is convenient if you are using two VHF/UHF sources (antenna, CATV cable, or cable box). For details, see pages 16 to 19.
[8] TO CONVERTER	Connects to your cable box input jack. This VHF/UHF output jack lets you set up your TV to switch between scrambled channels (coming through a cable box) and unscrambled cable channels. Use this jack instead of a splitter to get better picture quality when you need to switch between scrambled and unscrambled cable channels. For details, see pages 18 to 19.
[9] VHF/UHF	Primary RF input that connects to your VHF/UHF antenna or cable.
[10] CONTROL S IN/OUT	Allows the TV to receive (IN) and send (OUT) remote control signals to other Sony infrared-controlled audio or video equipment that has the CONTROL S function.

* High-bandwidth Digital Content Protection

Basic Connections: Connecting a Cable or Antenna

The way in which you will connect your TV varies, depending on how your home receives a signal (cable, cable box, antenna) and whether or not you plan to connect a VCR.

If You Are Connecting	See Page
Cable or Antenna Only	15
<input type="checkbox"/> No cable box or VCR	
Cable and Antenna Only	16
<input type="checkbox"/> No cable box or VCR	
Cable Box and Cable Only	18
<input type="checkbox"/> Cable box unscrambles only some channels (usually premium channels)	
<input type="checkbox"/> No VCR	
Cable Box Only	20
<input type="checkbox"/> Cable box unscrambles all channels	
<input type="checkbox"/> No VCR	

If you are connecting a VCR

- ☐ See the connections described on pages 22 and 24.

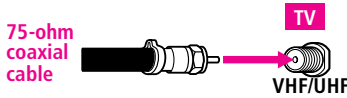

**Cable or Antenna
Only**

For best results, use one of the following connections if you are connecting a cable or an antenna and you:

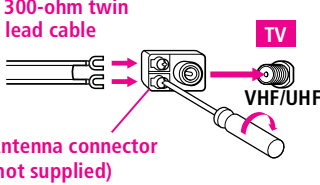

- ❑ Do not need a cable box to unscramble channels. (If you have a cable box, see pages 18-20.)
- ❑ Do not intend to connect a VCR. (If you have a VCR, see pages 22 and 24.)

The connection you choose depends on the cable type you have in your home, as described below.

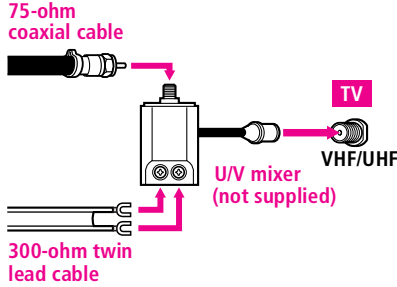

75-ohm coaxial cable (usually found in newer homes)

Cable Type	Connect As Shown
VHF Only or combined VHF/UHF or Cable	 <p>75-ohm coaxial cable</p> <p>TV</p> <p>VHF/UHF</p>

300-ohm twin lead cable (usually found in older homes)

Cable Type	Connect As Shown
VHF Only or UHF Only or combined VHF/UHF	 <p>300-ohm twin lead cable</p> <p>TV</p> <p>VHF/UHF</p> <p>Antenna connector (not supplied)</p>

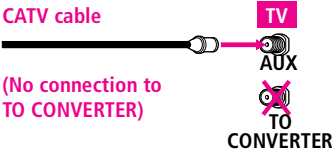

75-ohm coaxial and 300-ohm twin lead cable (found in some homes)

Cable Type	Connect As Shown
VHF and UHF	 <p>75-ohm coaxial cable</p> <p>TV</p> <p>VHF/UHF</p> <p>U/V mixer (not supplied)</p> <p>300-ohm twin lead cable</p>

Cable and Antenna
Only

For best results, use this connection if you:

- Have a cable and an antenna.
(This is convenient if you are using a separate rooftop antenna to receive additional channels that are not provided by your cable company.)
- Do not have a cable box or VCR. (If you have a cable box, see pages 18 to 20. If you have a VCR, see pages 22 and 24.)

Cable Type	Connect As Shown
Cable TV (CATV) and Antenna	<div><div>CATV cable</div><div></div><div>(No connection to TO CONVERTER)</div><div>Antenna cable</div><div></div></div>

About Using Twin View with This Connection

With this connection, you cannot view CATV channels in the right Twin View window.
For details about Twin View, see page 46.

Notes on Using This Connection

To Do This ...	Do This ...
Switch the TV's input between the cable and antenna	Press ANT to switch back and forth between the TV's VHF/UHF and AUX inputs.
Receive channels using an antenna, instead of the cable	<div><div>1</div><div>Press ANT to switch to the AUX input.</div></div> <div><div>2</div><div>Set the Cable option to Off. For details, see "Selecting Channel Options" on page 68.</div></div> <div><div>3</div><div>Run the Auto Setup program, as described in "Using Auto Setup" on page 38.</div></div>

Cable Box and Cable Only

 **DIGITAL CABLE BOX USERS:** Do not use this connection. The TO CONVERTER jack is not compatible with digital cable boxes.

For best results, use this connection if:

- ❑ Your cable company scrambles some channels, such as premium channels (which requires you to use a cable box), but does not scramble all channels.
- ❑ You do not have a VCR. (If you have a VCR, see pages 22 and 24.)

With this connection you can:

- ❑ Use the TV remote control to change channels coming through the cable box to the TV's AUX input jack. (You must first program the remote control for your specific cable box; see "Programming the Remote Control" on page 43.)
- ❑ Use the TV remote control to change channels coming directly into the TV's VHF/UHF input. (The TV's tuner provides a better signal than the cable box.)

About Using Twin View with This Connection

With this connection, you can use all the Twin View features for unscrambled channels coming directly into the TV's VHF/UHF input jack.

However, you can use only some of the Twin View features for channels coming through the cable box to the TV's AUX input jack. For example, when you switch the TV's input to AUX — to select the cable box input — the picture displays only in the left window. If you turn on Twin View, you can watch cable channels coming into the VHF/UHF jack in the right window, but you cannot SWAP the pictures between the left and right windows.

For details about Twin View, see page 46.

To connect the cable box and cable

- 1 Connect the cable from your cable company to the TV's VHF/UHF jack.
- 2 Use a coaxial cable to connect the TV's TO CONVERTER jack to the cable box's input jack. (The TV's internal converter lets you switch between unscrambled signals coming straight into the TV and scrambled signals coming in through the cable box, eliminating the need for an external splitter.)
- 3 Use a coaxial cable to connect the cable box's output jack to the TV's AUX jack.
- 4 Run the Auto Setup program, as described in "Setting Up the Channel List" on page 38.

If you have a digital cable box, you cannot use this connection because the TO CONVERTER jack is not compatible with digital cable boxes.

Notes on Using This Connection

To Do This ...	Do This ...
Use the cable box	Tune the TV to the channel the cable box is set to (usually channel 3 or 4) and then use the cable box to switch channels.
Set up the TV remote control to operate the cable box	Program the remote control. See "Programming the Remote Control" on pages 43-44.
Activate the remote control to operate the cable box	Press SAT/CABLE FUNCTION .
Prevent the accidental switching of TV channels	When using the cable box, you need the TV to stay on the channel the cable box is set to (usually channel 3 or 4). You can use the TV's Channel Fix feature to lock in a specific channel. For details, see "Using the Channel Menu" on page 68.
Switch the TV's input between the cable box and cable	Press ANT to switch back and forth between the TV's VHF/UHF (unscrambled channels) and AUX (scrambled) inputs.

Cable Box Only

For best results, use this connection if:

- ❑ Your cable company scrambles all channels, which requires you to use a cable box.
- ❑ You do not have a VCR. (If you have a VCR, see pages 22 and 24.)

With this connection you can:

- ❑ Use the TV remote control to change channels coming through the cable box to the TV's VHF/UHF jack. (You must first program the remote control for your specific cable box.)

About Using Twin View with This Connection

With this connection, all channels come into the TV through your cable box and only one unscrambled signal is sent to the TV, so you cannot use the Twin View feature. If some of your channels are scrambled, but others are not, consider using the "Cable Box and Cable" connection on page 18 instead. For details about Twin View, see page 46.

To connect the cable box

- 1 Connect the CATV cable to the cable box's input jack.
- 2 Use a coaxial cable to connect the cable box's output jack to the TV's VHF/UHF jack.
- 3 Run the Auto Setup program, as described in "Setting Up the Channel List" on page 38.

Notes on Using This Connection

To Do This ...	Do This ...
Use the cable box	Tune the TV to the channel the cable box is set to (usually channel 3 or 4) and then use the cable box to switch channels.
Set up the TV remote control to operate the cable box	Program the remote control. See "Programming the Remote Control" on pages 43-44.
Activate the remote control to operate the cable box	Press SAT/CABLE FUNCTION .
Prevent the accidental switching of TV channels	When using the cable box, you need the TV to stay on the channel the cable box is set to (usually channel 3 or 4). You can use the TV's Channel Fix feature to lock in a specific channel. For details, see "Using the Channel Menu" on page 68.

Connecting Optional Equipment

Use the directions in this section to connect the following optional equipment:

If You Are Connecting	See Page
VCR and Cable	22
VCR and Cable Box	24
Two VCRs for Tape Editing	26
Satellite Receiver	28
Satellite Receiver and VCR	30
DVD Player with Component Video Connectors	32
DVD Player with S VIDEO and Audio Connectors	34
Camcorder	35
Audio Receiver	36

About Using S VIDEO

If the optional equipment you are connecting has an S VIDEO jack (shown at left), you can use an S VIDEO cable for improved picture quality (compared to an A/V cable). Because S VIDEO carries only the video signal, you also need to connect audio cables for sound, as shown below.

Example of an S VIDEO Connection

VCR and Cable

For best results, use this connection if:

- ❑ Your cable company does not require you to use a cable box.

About Using Twin View with This Connection

With this connection, you can use all the features of Twin View. For details about Twin View, see page 46.

Using
S VIDEO jacks?
See page 21.

To connect the VCR and cable

- 1 Connect the CATV cable to the VCR's VHF/UHF input jack.
- 2 Use a coaxial cable to connect the VCR's VHF/UHF output jack to the TV's VHF/UHF jack.
- 3 Use an A/V cable to connect the VCR's A/V output jacks to the TV's A/V input jacks.
- 4 Run the Auto Setup program, as described in "Setting Up the Channel List" on page 38.

Notes on Using This Connection

<i>To Do This ...</i>	<i>Do This ...</i>
Watch the VCR	Press TV/VIDEO repeatedly to select the VCR input (VIDEO 1 in the illustration).
Watch cable channels	Press TV/VIDEO repeatedly to select the cable input (VHF/UHF in the illustration).
Set up the TV remote control to operate the VCR	If you have a non-Sony VCR, you must program the remote control. See “Programming the Remote Control” on pages 43-44.
Activate the TV remote control to operate the VCR	Set the A/V slide switch to the position you programmed for the VCR. Then press VCR/DVD FUNCTION .
Control VCR functions with the TV remote control	See “Operating a VCR” on page 60.
Label video inputs to easily identify equipment connected to the TV	See the instructions for setting up Video Labels on pages 74-75.

VCR and Cable Box

For best results, use this connection if:

- ❑ Your cable company scrambles some channels, such as premium channels (which requires you to use a cable box), but does not scramble all channels.

About Using Twin View with This Connection

With this connection, you can use all the features of Twin View. For details about Twin View, see page 46.

With this connection you can:

- ❑ Use the TV remote control to change channels coming through the cable box. (You must first program the remote control for your specific cable box; see “Programming the Remote Control” on page 43.)
- ❑ Use the TV remote control to change channels coming directly into the TV’s VHF/UHF jack. (The TV’s tuner provides a better signal than the cable box.)
- ❑ Record channels coming through the cable box and channels coming directly into the TV.

To connect a VCR and cable box, you need:

- ❑ A splitter, which is a small, inexpensive device that you can purchase at your local electronics store.

DIGITAL CABLE BOX USERS: If you are connecting a digital cable box, you will need a special bi-directional splitter that is designed to work with your digital cable box. Contact your cable provider for details.

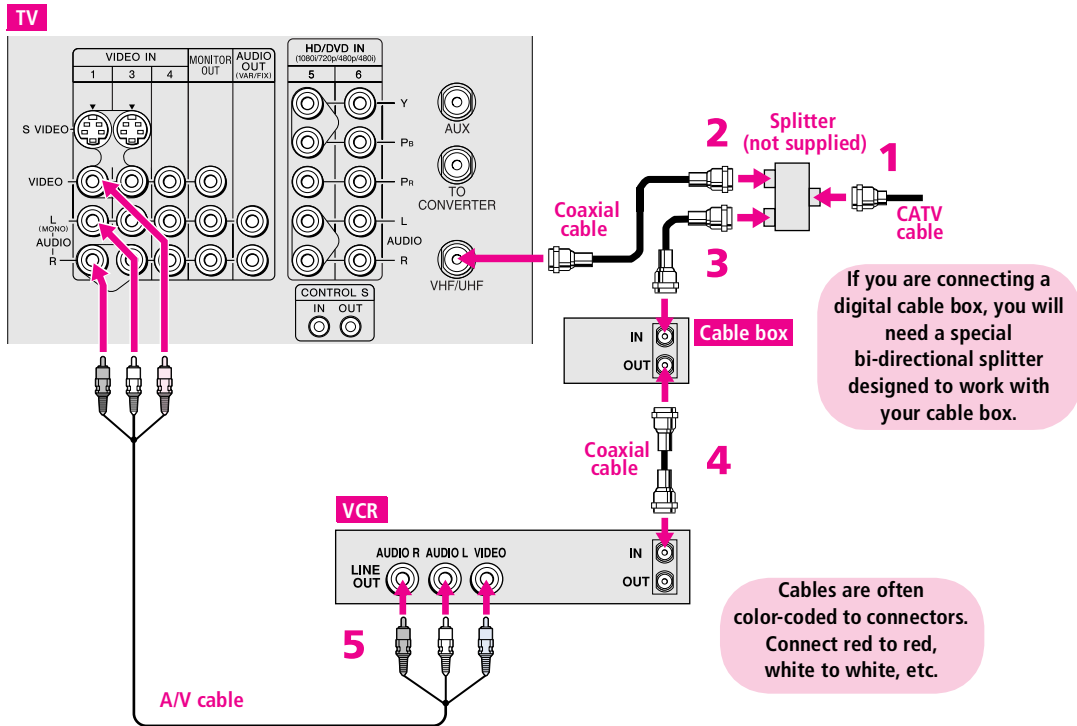

- ❑ Three coaxial cables.
- ❑ One A/V cable or one S VIDEO cable with audio cables.

To connect the VCR and cable box

- 1 Connect the CATV cable to the single (input) jack of the splitter.
- 2 Use a coaxial cable to connect one of the splitter’s two output jacks to the TV’s VHF/UHF jack.
- 3 Use a coaxial cable to connect the splitter’s other output jack to the cable box’s input jack.
- 4 Use a coaxial cable to connect the cable box’s output jack to the VCR’s RF input jack.
- 5 Use an A/V cable to connect the VCR’s A/V output jacks to the TV’s A/V input jacks.
- 6 Run the Auto Setup program, as described in “Setting Up the Channel List” on page 38.

Using
S VIDEO jacks?
See page 21.

Notes on Using This Connection

To Do This ...	Do This ...
Watch cable (unscrambled) channels	Press TV/VIDEO repeatedly to select the cable input (UHF/VHF in the illustration).
Watch cable box (scrambled) channels	Turn on the VCR and tune it to the channel the cable box is set to (usually channel 3 or 4). Press TV/VIDEO repeatedly to select the VCR input (VIDEO 1 in the illustration). Use the cable box to change channels.
Watch the VCR	Press TV/VIDEO repeatedly to select the VCR input (VIDEO 1 in the illustration).
Set up the TV remote control to operate the cable box or VCR	If you have a non-Sony VCR, you must program the remote control. See "Programming the Remote Control" on pages 43-44.
Activate the remote control to operate the cable box or VCR	For the cable box, press SAT/CABLE FUNCTION . For the VCR, set the A/V slide switch to the position you programmed for the VCR. Then press VCR/DVD FUNCTION .
Control specific cable box and VCR functions with the TV remote control	See "Operating a Cable Box" on page 61 and "Operating a VCR" on page 60.
Label video inputs to easily identify equipment connected to the TV	See the instructions for setting up Video Labels on pages 74-75.

Two VCRs for Tape Editing

Using
S VIDEO jacks?
See page 21.

Connecting two VCRs lets you record from one VCR to the other. By connecting them as shown below, you can view (monitor) what is being recorded.

To connect two VCRs for tape editing

- 1 Use an A/V cable to connect the playback VCR's A/V output jacks to the TV's A/V input jacks.
- 2 Use an A/V cable to connect the recording VCR's A/V input jacks to the TV's MONITOR OUT jacks.

Notes on Using This Connection

<i>To Do This ...</i>	<i>Do This ...</i>
View (monitor) what is being recorded	Press TV/VIDEO repeatedly to select the VCR input (VIDEO 1 in the illustration above).
Set up the TV remote control to operate the VCR(s)	If you have a non-Sony VCR, you must program the remote control. See “Programming the Remote Control” on pages 43-44.
Activate the TV remote control to operate the VCR(s)	Set the A/V slide switch to the position you programmed for the VCR. Then press VCR/DVD FUNCTION .
Control VCR functions with the TV remote control	See “Operating a VCR” on page 60.
Label video inputs to easily identify equipment connected to the TV	See the instructions for setting up Video Labels on pages 74-75.

Satellite Receiver

Using
S VIDEO jacks?
See page 21.

To connect a satellite receiver

- 1 Connect the satellite antenna cable to the satellite receiver's satellite input jack.
- 2 Use an A/V cable to connect the satellite receiver's A/V output jacks to the TV's A/V input jacks.
- 3 Connect a CATV cable from your cable or antenna to the TV's VHF/UHF jack.
- 4 Run the Auto Setup program, as described in "Setting Up the Channel List" on page 38.

Cables are often
color-coded to connectors.
Connect red to red,
white to white, etc.

Notes on Using This Connection

To Do This ...	Do This ...
Watch the satellite receiver	Press TV/VIDEO repeatedly to select the satellite receiver input (VIDEO 1 in the illustration).
Set up the TV remote control to operate the satellite receiver	If you have a non-Sony satellite receiver, you must program the remote control. See “Programming the Remote Control” on pages 43-44.
Activate the TV remote control to operate the satellite receiver	Press SAT/CABLE FUNCTION .
Control satellite receiver functions with the TV remote control	See “Operating a Satellite Receiver” on page 60.
Label video inputs to easily identify equipment connected to the TV	See the instructions for setting up Video Labels on pages 74-75.

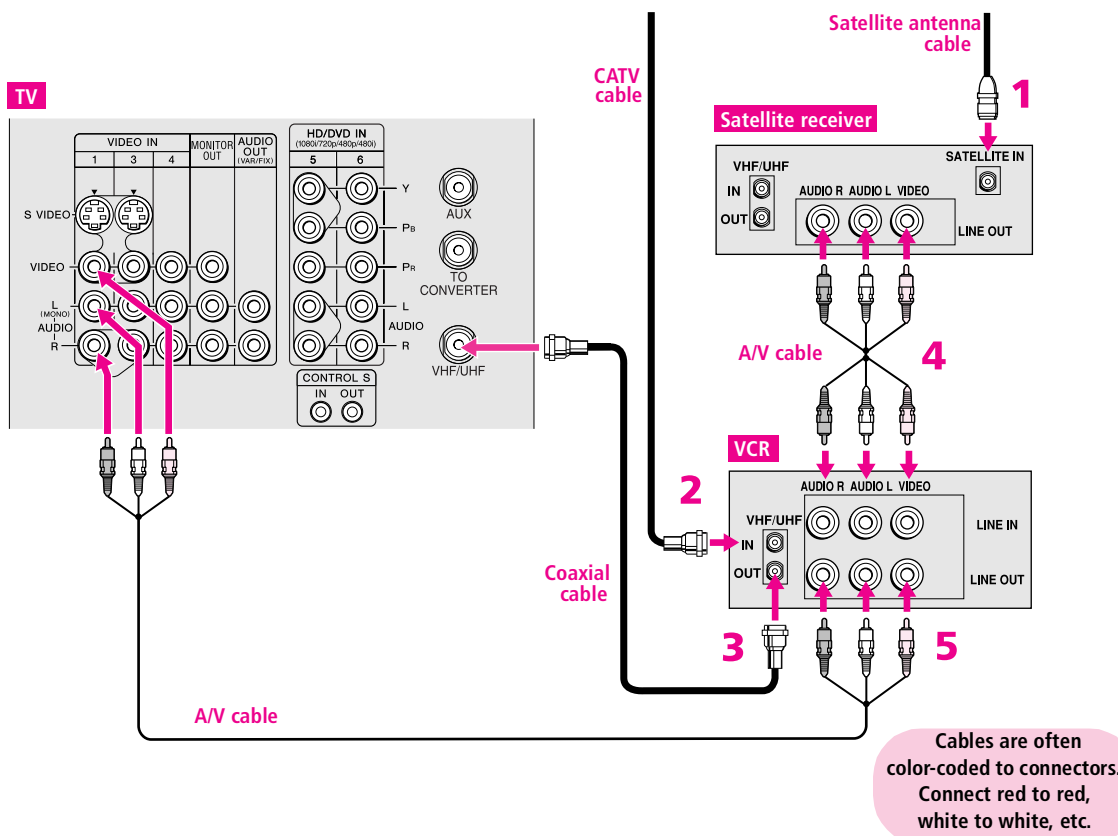

Satellite Receiver and VCR

Using
S VIDEO jacks?
See page 21.

To connect a satellite receiver and VCR

- 1 Connect the satellite antenna cable to the satellite receiver's satellite input jack.
- 2 Connect the CATV cable to the VCR's VHF/UHF input jack.
- 3 Use a coaxial cable to connect the VCR's VHF/UHF output jack to the TV's VHF/UHF jack.
- 4 Use an A/V cable to connect the satellite receiver's A/V output jacks to the VCR's A/V input jacks.
- 5 Use an A/V cable to connect the VCR's A/V output jacks to the TV's A/V input jacks.
- 6 Run the Auto Setup program, as described in "Setting Up the Channel List" on page 38.

Notes on Using This Connection

<i>To Do This ...</i>	<i>Do This ...</i>
Watch the satellite receiver	Press TV/VIDEO repeatedly to select the VCR input (VIDEO 1 in the illustration). The VCR may need to be turned on and set to the satellite receiver input.
Watch the VCR	Press TV/VIDEO repeatedly to select the input to which the VCR is connected (VIDEO 1 in the illustration).
Set up the TV remote control to operate the satellite receiver or VCR	If you have a non-Sony VCR or satellite receiver, you must program the remote control. See “Programming the Remote Control” on pages 43-44.
Activate the TV remote control to operate the satellite receiver or VCR	For the satellite receiver, press SAT/CABLE FUNCTION . For the VCR, set the A/V slide switch to the position you programmed for the VCR. Then press VCR/DVD FUNCTION .
Control satellite receiver and VCR functions with the TV remote control	See “Operating a Satellite Receiver” on page 60 and “Operating a VCR” on page 60.
Label video inputs to easily identify equipment connected to the TV	See the instructions for setting up Video Labels on pages 74-75.

DVD Player with Component Video Connectors

For best results, use this connection if your DVD player has component video (Y, P_B, P_R) jacks.

To connect a DVD player with component video connectors

- 1 Use three separate component video cables to connect the DVD player's Y, P_B and P_R jacks to the Y, P_B and P_R jacks (VIDEO 5) on the TV.

 The Y, P_B and P_R jacks on your DVD player are sometimes labeled Y, C_B and C_R, or Y, B-Y and R-Y. If so, connect the cables to like colors.

- 2 Use an audio cable to connect the DVD player's audio output jacks to the TV's VIDEO 5 audio input jacks.

Notes on Using This Connection

To Do This ...	Do This ...
Watch the DVD player	Press TV/VIDEO repeatedly to select the DVD input (VIDEO 5 in the illustration).
Set up the TV remote control to operate the DVD player	If you have a non-Sony DVD player, you must program the remote control. See “Programming the Remote Control” on pages 43-44.
Activate the TV remote control to operate the DVD player	Set the A/V slide switch to the position you programmed for the DVD player. Then press VCR/DVD FUNCTION .
Control DVD functions with the TV remote control	See “Operating a DVD Player” on page 61.
Label video inputs to easily identify equipment connected to the TV	See the instructions for setting up Video Labels on pages 74-75.

 You cannot record the signal from any equipment connected into the Y, PB, PR jacks.

DVD Player with S VIDEO and Audio Connectors

Use this connection if your DVD player does not have component video (Y, PB, PR) jacks.

To connect a DVD player with A/V connectors

- 1 Use an audio cable to connect the DVD player's audio output jacks to the TV's audio input jacks.
- 2 Use an S VIDEO cable to connect the DVD player's S VIDEO jack to the TV's S VIDEO jack.

Cables are often color-coded to connectors. Connect red to red, white to white, etc.

Notes on Using This Connection

To Do This ...	Do This ...
Watch the DVD player	Press TV/VIDEO repeatedly to select the DVD input (VIDEO 1 in the illustration).
Set up the TV remote control to operate the DVD player	If you have a non-Sony DVD player, you must program the remote control. See "Programming the Remote Control" on pages 43-44.
Activate the TV remote control to operate the DVD player	Set the A/V slide switch to the position you programmed for the DVD player. Then press VCR/DVD FUNCTION .
Control DVD functions with the TV remote control	See "Operating a DVD Player" on page 61.
Label video inputs to easily identify equipment connected to the TV	See the instructions for setting up Video Labels on pages 74-75.

Camcorder

Using
S VIDEO jacks?
See page 21.

For easy connection of a camcorder, the TV has front A/V input jacks. If you prefer, however, you can connect the camcorder to the TV's rear A/V input jacks.

To connect a camcorder

- 1 Use A/V cables to connect the camcorder's A/V output jacks to the TV's A/V input jacks.

If you have a mono camcorder, connect its audio output jack to the TV's L MONO audio jack.

Note on Using This Connection

To Do This ...	Do This ...
Watch the camcorder	Press TV/VIDEO repeatedly to select the camcorder input (VIDEO 2 in the illustration).
Label video inputs to easily identify equipment connected to the TV	See the instructions for setting up Video Labels on pages 74-75.

Audio Receiver

For improved sound quality, you may want to play the TV's audio through your stereo system.

To connect an audio system

- 1 Use an audio cable to connect the TV's audio output jacks to the audio receiver's line input jacks.

Cables are often color-coded to connectors. Connect red to red, white to white.

- 2 Using the TV's Audio Menu, set the **Speaker** option to **Off**. Then set the **Audio Out** option to **Fixed** or **Variable**, depending on how you want to control the volume. For details, see "Using the Audio Menu" on page 66.
- 3 Turn on the audio receiver, and then set the receiver's line input to the jack into which you connected the TV.

Using the **CONTROL S** Feature

CONTROL S allows you to control your system and other Sony equipment with one remote control. In addition to allowing you to control multiple devices with one remote control, the CONTROL S feature allows you to always point your remote control at your TV, instead of having to point it at the other equipment, which might be hidden or out of direct line of sight.

Use CONTROL S IN to send signals to the TV.

Use CONTROL S OUT to send signals to connected equipment.

Setting Up the Channel List

After you finish connecting your TV, you need to run Auto Setup to set up your channels. The Auto Setup screen appears when you turn on your TV for the first time after hooking it up. If you do not want to set up the channels at this time, you can do it later by selecting the Auto Program option in the Channel Menu (see page 68).

 The Auto Setup feature does not apply for installations that use a cable box for all channel selection.

Using Auto Setup

- 1 Press **POWER** to turn on the TV.
- 2 Press **TV FUNCTION** on the remote control.
- 3 To continue running Auto Setup, press **CH+**. To exit Auto Setup, press **CH-**.

Auto Setup automatically creates a list of receivable channels. When finished, the lowest numbered channel is displayed.

To reset the TV to factory settings

- 1 Press **POWER** to turn on the TV.
- 2 Hold down **RESET** on the remote control.
- 3 Press **TV POWER** on the TV. (The TV will turn itself off, then back on.)
- 4 Release **RESET**.

Setting Up the TV

Overview

This chapter includes illustrated instructions for setting up your TV.

Topic	Page(s)
TV Controls and Connectors	10-13
Basic Connections: Connecting a Cable or Antenna	14-20
Connecting Optional Equipment	
VCR and Cable	22
VCR and Cable Box	24
Two VCRs for Tape Editing	26

Satellite Receiver and VCR	30
DVD Player with Component Video Connectors	32
DVD Player with S VIDEO and Audio Connectors	34
Camcorder	35
Audio Receiver	36
Using the CONTROL S Feature	37
Setting Up the Channel List	38

About the AC Power Cord

The AC power cord is attached to the rear of the TV with a hook. Use caution when removing the AC plug from its holder. Gently slide the plug upward to remove it from the hook. Once removed, the AC power plug should automatically disengage from its stored location.

 **Do not plug in the AC power cord until you have made all other connections.**

TV Controls and Connectors

Front Panel

Item	Description
1 S VIDEO VIDEO 2 INPUT	Connects to the S VIDEO OUT jack on your camcorder or other video equipment that has S VIDEO. Provides better picture quality than composite video (2).
2 VIDEO/L(MONO)-AUDIO-R VIDEO 2 INPUT	Connects to the composite A/V output jacks on your camcorder or other video equipment.
3 MEMORY STICK	Memory Stick insertion slot. For details, see “Using the Memory Stick Picture Viewer” on page 54.
4 MEMORY STICK LED	When lit, indicates that the Memory Stick is being read. (Do not remove the Memory Stick when the indicator is lit.)
5 TV/VIDEO	Press repeatedly to cycle through the video equipment connected to the TV’s video inputs.
6 -VOLUME +	Press to adjust the volume.
7 -CHANNEL+	Press to scan through channels. To scan quickly through channels, press and hold down either CHANNEL button.
8 TIMER LED	When lit, indicates one of the timers is set. When the timer is set, this LED will remain lit even if the TV is turned off. For details, see page 79.
9 STAND BY LED	Blinks when the TV is turned on, then shuts off when the picture is displayed. If the LED blinks continuously, this may indicate the TV needs service (see “Contacting Sony” on page 84).
10 Infrared Receiver (IR)	Receives IR signals from the TV’s remote control.
11 POWER	Press to turn on and off the TV.

Rear Panel

Jack	Description
[1] DVI-HDTV VIDEO AUDIO R/L (VIDEO 7 IN)	Can accommodate a copy-protected digital connection (HDCP*) to other devices (such as digital set-top boxes) that have compatible interfaces. The DVI-HDTV input terminal is compliant with the EIA-861 standard and is not intended for use with personal computers. See the instruction manual that came with your equipment for details about connecting and using it with the TV.
[2] S VIDEO IN 1/3	Connects to the S VIDEO OUT jack of your VCR or other video equipment that has S VIDEO. S VIDEO provides better picture quality than either composite video ([3]) or VHF/UHF ([9]) connections.
[3] VIDEO IN 1/3/4 VIDEO/L(MONO) -AUDIO-R	Connect to the composite A/V output jacks on your VCR or other video component. A fourth component A/V input jack (VIDEO 2) is located on the front panel of the TV. This video connection provides better picture quality than the VHF/UHF ([9]) connection.
[4] MONITOR OUT	Lets you record the program you are watching to a VCR. When two VCRs are connected, you can use the TV as a monitor for tape-to-tape editing (not available with 480p, 720p, or 1080i when the input is set to VIDEO 5 or 6).
[5] AUDIO OUT (VAR/FIX) L (MONO)/R	Connects to the left and right audio input jacks of your audio or video equipment. You can use these outputs to listen to your TV's audio through your stereo system.
[6] HD/DVD IN 5/6 (1080i/720p/480p/480i)	Connect to your DVD player's or digital set-top box's component video (Y, Pb, Pr) and audio (L/R) jacks. Component video provides better picture quality than [2] , [3] , or [9] .
[7] AUX	Auxiliary RF input that connects to your antenna, CATV cable, or cable box output jack. This is convenient if you are using two VHF/UHF sources (antenna, CATV cable, or cable box). For details, see pages 16 to 19.
[8] TO CONVERTER	Connects to your cable box input jack. This VHF/UHF output jack lets you set up your TV to switch between scrambled channels (coming through a cable box) and unscrambled cable channels. Use this jack instead of a splitter to get better picture quality when you need to switch between scrambled and unscrambled cable channels. For details, see pages 18 to 19.
[9] VHF/UHF	Primary RF input that connects to your VHF/UHF antenna or cable.
[10] CONTROL S IN/OUT	Allows the TV to receive (IN) and send (OUT) remote control signals to other Sony infrared-controlled audio or video equipment that has the CONTROL S function.

* High-bandwidth Digital Content Protection

Basic Connections: Connecting a Cable or Antenna

The way in which you will connect your TV varies, depending on how your home receives a signal (cable, cable box, antenna) and whether or not you plan to connect a VCR.

If You Are Connecting	See Page
Cable or Antenna Only	15
<input type="checkbox"/> No cable box or VCR	
Cable and Antenna Only	16
<input type="checkbox"/> No cable box or VCR	
Cable Box and Cable Only	18
<input type="checkbox"/> Cable box unscrambles only some channels (usually premium channels)	
<input type="checkbox"/> No VCR	
Cable Box Only	20
<input type="checkbox"/> Cable box unscrambles all channels	
<input type="checkbox"/> No VCR	

If you are connecting a VCR

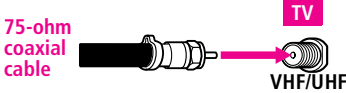

- ☐ See the connections described on pages 22 and 24.

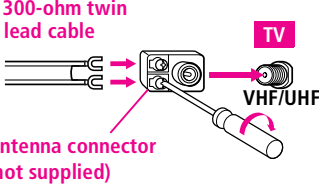

**Cable or Antenna
Only**

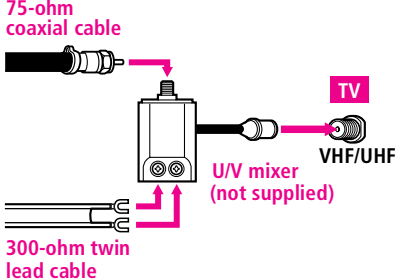

For best results, use one of the following connections if you are connecting a cable or an antenna and you:

- ❑ Do not need a cable box to unscramble channels. (If you have a cable box, see pages 18-20.)
- ❑ Do not intend to connect a VCR. (If you have a VCR, see pages 22 and 24.)

The connection you choose depends on the cable type you have in your home, as described below.

75-ohm coaxial cable (usually found in newer homes)	
Cable Type	Connect As Shown
VHF Only or combined VHF/UHF or Cable	 <p>75-ohm coaxial cable</p> <p>TV</p> <p>VHF/UHF</p>

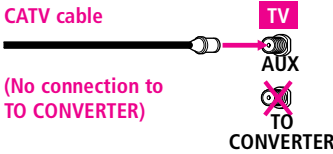

300-ohm twin lead cable (usually found in older homes)	
Cable Type	Connect As Shown
VHF Only or UHF Only or combined VHF/UHF	 <p>300-ohm twin lead cable</p> <p>TV</p> <p>VHF/UHF</p> <p>Antenna connector (not supplied)</p>

75-ohm coaxial and 300-ohm twin lead cable (found in some homes)	
Cable Type	Connect As Shown
VHF and UHF	 <p>75-ohm coaxial cable</p> <p>TV</p> <p>VHF/UHF</p> <p>U/V mixer (not supplied)</p> <p>300-ohm twin lead cable</p>

**Cable and Antenna
Only**

For best results, use this connection if you:

- ❑ Have a cable and an antenna.
(This is convenient if you are using a separate rooftop antenna to receive additional channels that are not provided by your cable company.)
- ❑ Do not have a cable box or VCR. (If you have a cable box, see pages 18 to 20. If you have a VCR, see pages 22 and 24.)

Cable Type	Connect As Shown
Cable TV (CATV) and Antenna	<div><div>CATV cable</div><div></div><div>(No connection to TO CONVERTER)</div><div>Antenna cable</div><div></div></div>

About Using This Connection with Dual Picture (Twin View, etc.) Features

With this connection, you cannot view CATV channels in the right dual picture window.

Notes on Using This Connection

To Do This ...	Do This ...
Switch the TV's input between the cable and antenna	Press ANT to switch back and forth between the TV's VHF/UHF and AUX inputs.
Receive channels using an antenna, instead of the cable	<div><div>1</div><div>Press ANT to switch to the AUX input.</div></div> <div><div>2</div><div>Set the Cable option to Off. For details, see "Selecting Channel Options" on page 72.</div></div> <div><div>3</div><div>Run the Auto Setup program, as described in "Using Auto Setup" on page 38.</div></div>

 **DIGITAL CABLE BOX USERS:** Do not use this connection. The TO CONVERTER jack is not compatible with digital cable boxes.

For best results, use this connection if:

- ❑ Your cable company scrambles some channels, such as premium channels (which requires you to use a cable box), but does not scramble all channels.
- ❑ You do not have a VCR. (If you have a VCR, see pages 22 and 24.)

With this connection you can:

- ❑ Use the TV remote control to change channels coming through the cable box to the TV's AUX input jack. (You must first program the remote control for your specific cable box; see "Programming the Remote Control" on page 43.)
- ❑ Use the TV remote control to change channels coming directly into the TV's VHF/UHF input. (The TV's tuner provides a better signal than the cable box.)

About Using This Connection with Dual Picture (Twin View, etc.) Features

With this connection, you can use all the dual picture features for unscrambled channels coming directly into the TV's VHF/UHF input jack.

However, you can use only some of the dual picture features for channels coming through the cable box to the TV's AUX input jack. For example, when you switch the TV's input to AUX — to select the cable box input — the picture displays only in the left window. For example, if you turn on Twin View, you can watch cable channels coming into the VHF/UHF jack in the right window, but you cannot swap the pictures between the left and right windows.

To connect the cable box and cable

- 1 Connect the cable from your cable company to the TV's VHF/UHF jack.
- 2 Use a coaxial cable to connect the TV's TO CONVERTER jack to the cable box's input jack. (The TV's internal converter lets you switch between unscrambled signals coming straight into the TV and scrambled signals coming in through the cable box, eliminating the need for an external splitter.)
- 3 Use a coaxial cable to connect the cable box's output jack to the TV's AUX jack.
- 4 Run the Auto Setup program, as described in "Setting Up the Channel List" on page 38.

If you have a digital cable box, you cannot use this connection because the TO CONVERTER jack is not compatible with digital cable boxes.

Notes on Using This Connection

To Do This ...	Do This ...
Use the cable box	Tune the TV to the channel the cable box is set to (usually channel 3 or 4) and then use the cable box to switch channels.
Set up the TV remote control to operate the cable box	Program the remote control. See "Programming the Remote Control" on pages 43-44.
Activate the remote control to operate the cable box	Press SAT/CABLE FUNCTION .
Prevent the accidental switching of TV channels	When using the cable box, you need the TV to stay on the channel the cable box is set to (usually channel 3 or 4). You can use the TV's Channel Fix feature to lock in a specific channel. For details, see "Using the Channel Menu" on page 72.
Switch the TV's input between the cable box and cable	Press ANT to switch back and forth between the TV's VHF/UHF (unscrambled channels) and AUX (scrambled) inputs.

Cable Box Only

For best results, use this connection if:

- ❑ Your cable company scrambles all channels, which requires you to use a cable box.
- ❑ You do not have a VCR. (If you have a VCR, see pages 22 and 24.)

With this connection you can:

- ❑ Use the TV remote control to change channels coming through the cable box to the TV's VHF/UHF jack. (You must first program the remote control for your specific cable box.)

About Using This Connection with Dual Picture (Twin View, etc.) Features

With this connection, all channels come into the TV through your cable box and only one unscrambled signal is sent to the TV, so you cannot use the dual picture features.. If some of your channels are scrambled, but others are not, consider using the "Cable Box and Cable" connection on page 18 instead.

To connect the cable box

- 1 Connect the CATV cable to the cable box's input jack.
- 2 Use a coaxial cable to connect the cable box's output jack to the TV's VHF/UHF jack.

Notes on Using This Connection

To Do This ...	Do This ...
Use the cable box	Tune the TV to the channel the cable box is set to (usually channel 3 or 4) and then use the cable box to switch channels.
Set up the TV remote control to operate the cable box	Program the remote control. See "Programming the Remote Control" on pages 43-44.
Activate the remote control to operate the cable box	Press SAT/CABLE FUNCTION .
Prevent the accidental switching of TV channels	When using the cable box, you need the TV to stay on the channel the cable box is set to (usually channel 3 or 4). You can use the TV's Channel Fix feature to lock in a specific channel. For details, see "Using the Channel Menu" on page 72.

Connecting Optional Equipment

Use the directions in this section to connect the following optional equipment:

<i>If You Are Connecting</i>	<i>See Page</i>
VCR and Cable	22
VCR and Cable Box	24
Two VCRs for Tape Editing	26
Satellite Receiver	28
Satellite Receiver and VCR	30
DVD Player with Component Video Connectors	32
DVD Player with S VIDEO and Audio Connectors	34
Camcorder	35
Audio Receiver	36

About Using S VIDEO

If the optional equipment you are connecting has an S VIDEO jack (shown at left), you can use an S VIDEO cable for improved picture quality (compared to an A/V cable). Because S VIDEO carries only the video signal, you also need to connect audio cables for sound, as shown below.

Example of an S VIDEO Connection

Cables are often color-coded to connectors. Connect red to red, white to white, etc.

VCR and Cable

For best results, use this connection if:

- ❑ Your cable company does not require you to use a cable box.

About Using This Connection with Dual Picture (Twin View, etc.) Features

With this connection, you can use all the dual picture features.

Using
S VIDEO jacks?
See page 21.

To connect the VCR and cable

- 1 Connect the CATV cable to the VCR's VHF/UHF input jack.
- 2 Use a coaxial cable to connect the VCR's VHF/UHF output jack to the TV's VHF/UHF jack.
- 3 Use an A/V cable to connect the VCR's A/V output jacks to the TV's A/V input jacks.
- 4 Run the Auto Setup program, as described in "Setting Up the Channel List" on page 38.

Notes on Using This Connection

<i>To Do This ...</i>	<i>Do This ...</i>
Watch the VCR	Press TV/VIDEO repeatedly to select the VCR input (VIDEO 1 in the illustration).
Watch cable channels	Press TV/VIDEO repeatedly to select the cable input (VHF/UHF in the illustration).
Set up the TV remote control to operate the VCR	If you have a non-Sony VCR, you must program the remote control. See “Programming the Remote Control” on pages 43-44.
Activate the TV remote control to operate the VCR	Open the outside cover, as shown on page 42. Then set the A/V slide switch to the position you programmed for the VCR.
Control VCR functions with the TV remote control	See “Operating a VCR” on page 62.
Label video inputs to easily identify equipment connected to the TV	See the instructions for setting up Video Labels on page 78.

VCR and Cable Box

For best results, use this connection if:

- ❑ Your cable company scrambles some channels, such as premium channels (which requires you to use a cable box), but does not scramble all channels.

About Using This Connection with Dual Picture (Twin View, etc.) Features

With this connection, you can use all the dual picture features.

With this connection you can:

- ❑ Use the TV remote control to change channels coming through the cable box. (You must first program the remote control for your specific cable box; see “Programming the Remote Control” on page 43.)
- ❑ Use the TV remote control to change channels coming directly into the TV’s VHF/UHF jack. (The TV’s tuner provides a better signal than the cable box.)
- ❑ Record channels coming through the cable box and channels coming directly into the TV.

To connect a VCR and cable box, you need:

- ❑ A splitter, which is a small, inexpensive device that you can purchase at your local electronics store.

DIGITAL CABLE BOX USERS: If you are connecting a digital cable box, you will need a special bi-directional splitter that is designed to work with your digital cable box. Contact your cable provider for details.

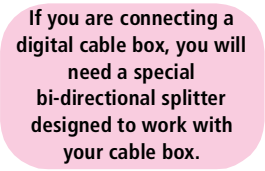

- ❑ Three coaxial cables.
- ❑ One A/V cable or one S VIDEO cable with audio cables.

To connect the VCR and cable box

- 1 Connect the CATV cable to the single (input) jack of the splitter.
- 2 Use a coaxial cable to connect one of the splitter’s two output jacks to the TV’s VHF/UHF jack.
- 3 Use a coaxial cable to connect the splitter’s other output jack to the cable box’s input jack.
- 4 Use a coaxial cable to connect the cable box’s output jack to the VCR’s RF input jack.
- 5 Use an A/V cable to connect the VCR’s A/V output jacks to the TV’s A/V input jacks.
- 6 Run the Auto Setup program, as described in “Setting Up the Channel List” on page 38.

Using
S VIDEO jacks?
See page 21.

Cables are often color-coded to connectors. Connect red to red, white to white, etc.

To Do This ...	Do This ...
Watch cable (unscrambled) channels	Press TV/VIDEO repeatedly to select the cable input (UHF/VHF in the illustration).
Watch cable box (scrambled) channels	Turn on the VCR and tune it to the channel the cable box is set to (usually channel 3 or 4). Press TV/VIDEO repeatedly to select the VCR input (VIDEO 1 in the illustration). Use the cable box to change channels.
Watch the VCR	Press TV/VIDEO repeatedly to select the VCR input (VIDEO 1 in the illustration).
Set up the TV remote control to operate the cable box or VCR	If you have a non-Sony VCR, you must program the remote control. See “Programming the Remote Control” on pages 43-44.
Activate the remote control to operate the cable box or VCR	For the cable box, press SAT/CABLE FUNCTION . For the VCR, open the outside cover, as shown on page 42. Then set the A/V slide switch to the position you programmed for the VCR.
Control specific cable box and VCR functions with the TV remote control	See “Operating a Cable Box” on page 63 and “Operating a VCR” on page 62.
Label video inputs to easily identify equipment connected to the TV	See the instructions for setting up Video Labels on page 78.

Two VCRs for Tape Editing

Using
S VIDEO jacks?
See page 21.

Connecting two VCRs lets you record from one VCR to the other. By connecting them as shown below, you can view (monitor) what is being recorded.

To connect two VCRs for tape editing

- 1 Use an A/V cable to connect the playback VCR's A/V output jacks to the TV's A/V input jacks.
- 2 Use an A/V cable to connect the recording VCR's A/V input jacks to the TV's MONITOR OUT jacks.

Notes on Using This Connection

To Do This ...	Do This ...
View (monitor) what is being recorded	Press TV/VIDEO repeatedly to select the VCR input (VIDEO 1 in the illustration above).
Set up the TV remote control to operate the VCR(s)	If you have a non-Sony VCR, you must program the remote control. See “Programming the Remote Control” on pages 43-44.
Activate the TV remote control to operate the VCR(s)	Open the outside cover, as shown on page 42. Then set the A/V slide switch to the position you programmed for the VCR.
Control VCR functions with the TV remote control	See “Operating a VCR” on page 62.
Label video inputs to easily identify equipment connected to the TV	See the instructions for setting up Video Labels on page 78.

Satellite Receiver

Using
S VIDEO jacks?
See page 21.

To connect a satellite receiver

- 1 Connect the satellite antenna cable to the satellite receiver's satellite input jack.
- 2 Use an A/V cable to connect the satellite receiver's A/V output jacks to the TV's A/V input jacks.
- 3 Connect a CATV cable from your cable or antenna to the TV's VHF/UHF jack.
- 4 Run the Auto Setup program, as described in "Setting Up the Channel List" on page 38.

Cables are often color-coded to connectors. Connect red to red, white to white, etc.

Notes on Using This Connection

<i>To Do This ...</i>	<i>Do This ...</i>
Watch the satellite receiver	Press TV/VIDEO repeatedly to select the satellite receiver input (VIDEO 1 in the illustration).
Set up the TV remote control to operate the satellite receiver	If you have a non-Sony satellite receiver, you must program the remote control. See “Programming the Remote Control” on pages 43-44.
Activate the TV remote control to operate the satellite receiver	Press SAT/CABLE FUNCTION .
Control satellite receiver functions with the TV remote control	See “Operating a Satellite Receiver” on page 62.
Label video inputs to easily identify equipment connected to the TV	See the instructions for setting up Video Labels on page 78.

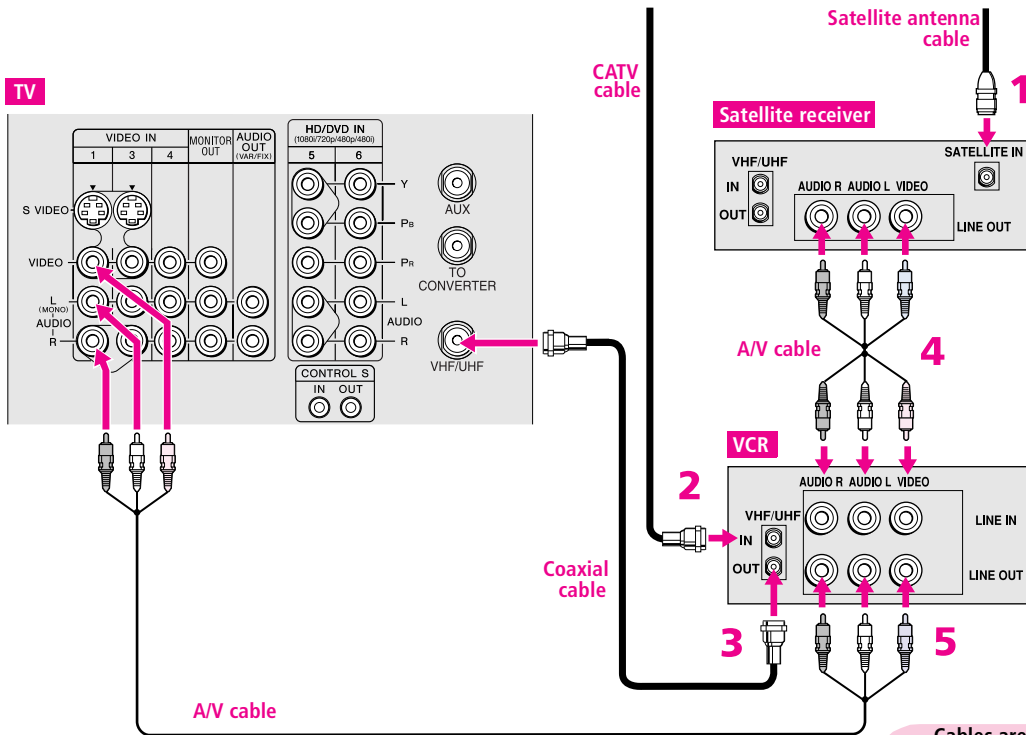

Satellite Receiver and VCR

Using
S VIDEO jacks?
See page 21.

To connect a satellite receiver and VCR

- 1 Connect the satellite antenna cable to the satellite receiver's satellite input jack.
- 2 Connect the CATV cable to the VCR's VHF/UHF input jack.
- 3 Use a coaxial cable to connect the VCR's VHF/UHF output jack to the TV's VHF/UHF jack.
- 4 Use an A/V cable to connect the satellite receiver's A/V output jacks to the VCR's A/V input jacks.
- 5 Use an A/V cable to connect the VCR's A/V output jacks to the TV's A/V input jacks.
- 6 Run the Auto Setup program, as described in "Setting Up the Channel List" on page 38.

Cables are often color-coded to connectors. Connect red to red, white to white, etc.

Notes on Using This Connection

<i>To Do This ...</i>	<i>Do This ...</i>
Watch the satellite receiver	Press TV/VIDEO repeatedly to select the VCR input (VIDEO 1 in the illustration). The VCR must be turned on and set to the satellite receiver's line input.
Watch the VCR	Press TV/VIDEO repeatedly to select the input to which the VCR is connected (VIDEO 1 in the illustration).
Set up the TV remote control to operate the satellite receiver or VCR	If you have a non-Sony VCR or satellite receiver, you must program the remote control. See "Programming the Remote Control" on pages 43-44.
Activate the TV remote control to operate the satellite receiver or VCR	For the satellite receiver, press SAT/CABLE FUNCTION . For the VCR, open the outside cover, as shown on page 42. Then set the A/V slide switch to the position you programmed for the VCR.
Control satellite receiver and VCR functions with the TV remote control	See "Operating a Satellite Receiver" on page 62 and "Operating a VCR" on page 62.
Label video inputs to easily identify equipment connected to the TV	See the instructions for setting up Video Labels on page 78.

DVD Player with Component Video Connectors

For best results, use this connection if your DVD player has component video (Y, P_B, P_R) jacks.

To connect a DVD player with component video connectors

- 1 Use three separate component video cables to connect the DVD player's Y, P_B and P_R jacks to the Y, P_B and P_R jacks (VIDEO 5) on the TV.

 The Y, P_B and P_R jacks on your DVD player are sometimes labeled Y, C_B and C_R, or Y, B-Y and R-Y. If so, connect the cables to like colors.

- 2 Use an audio cable to connect the DVD player's audio output jacks to the TV's VIDEO 5 audio input jacks.

Notes on Using This Connection

To Do This ...	Do This ...
Watch the DVD player	Press TV/VIDEO repeatedly to select the DVD input (VIDEO 5 in the illustration).
Set up the TV remote control to operate the DVD player	If you have a non-Sony DVD player, you must program the remote control. See “Programming the Remote Control” on pages 43-44.
Activate the TV remote control to operate the DVD player	Open the outside cover, as shown on page 42. Then set the A/V slide switch to the position you programmed for the DVD player.
Control DVD functions with the TV remote control	See “Operating a DVD Player” on page 63.
Label video inputs to easily identify equipment connected to the TV	See the instructions for setting up Video Labels on page 78.

 **You cannot record the signal from any equipment connected into the Y, PB, PR jacks.**

DVD Player with S VIDEO and Audio Connectors

Use this connection if your DVD player does not have component video (Y, PB, PR) jacks.

To connect a DVD player with A/V connectors

- 1 Use an audio cable to connect the DVD player's audio output jacks to the TV's audio input jacks.
- 2 Use an S VIDEO cable to connect the DVD player's S VIDEO jack to the TV's S VIDEO jack.

Cables are often color-coded to connectors. Connect red to red, white to white, etc.

Notes on Using This Connection

To Do This ...	Do This ...
Watch the DVD player	Press TV/VIDEO repeatedly to select the DVD input (VIDEO 1 in the illustration).
Set up the TV remote control to operate the DVD player	If you have a non-Sony DVD player, you must program the remote control. See "Programming the Remote Control" on pages 43-44.
Activate the TV remote control to operate the DVD player	Open the outside cover, as shown on page 42. Then set the A/V slide switch to the position you programmed for the DVD player.
Control DVD functions with the TV remote control	See "Operating a DVD Player" on page 63.
Label video inputs to easily identify equipment connected to the TV	See the instructions for setting up Video Labels on page 78.

Camcorder

Using
S VIDEO jacks?
See page 21.

For easy connection of a camcorder, the TV has front A/V input jacks. If you prefer, however, you can connect the camcorder to the TV's rear A/V input jacks.

To connect a camcorder

- 1 Use A/V cables to connect the camcorder's A/V output jacks to the TV's A/V input jacks.

If you have a mono camcorder, connect its audio output jack to the TV's L MONO audio jack.

Notes on Using This Connection

To Do This ...	Do This ...
Watch the camcorder	Press TV/VIDEO repeatedly to select the camcorder input (VIDEO 2 in the illustration).
Label video inputs to easily identify equipment connected to the TV	See the instructions for setting up Video Labels on page 78.

Audio Receiver

For improved sound quality, you may want to play the TV's audio through your stereo system.

To connect an audio system

- 1 Use an audio cable to connect the TV's audio output jacks to the audio receiver's line input jacks.

Cables are often color-coded to connectors. Connect red to red, white to white.

- 2 Using the TV's Audio Menu, set the **Speaker** option to **Off**. Then set the **Audio Out** option to **Fixed** or **Variable**, depending on how you want to control the volume. For details, see "Using the Audio Menu" on page 68.
- 3 Turn on the audio receiver, and then set the receiver's line input to the jack into which you connected the TV.

Using the **CONTROL S** Feature

CONTROL S allows you to control your system and other Sony equipment with one remote control. In addition to allowing you to control multiple devices with one remote control, the CONTROL S feature allows you to always point your remote control at your TV, instead of having to point it at the other equipment, which might be hidden or out of direct line of sight.

Use CONTROL S IN to send signals to the TV.

Use CONTROL S OUT to send signals to connected equipment.

Setting Up the Channel List

After you finish connecting your TV, you need to run Auto Setup to set up your channels. The Auto Setup screen appears when you turn on your TV for the first time after hooking it up. If you do not want to set up the channels at this time, you can do it later by selecting the Auto Program option in the Channel Menu (see page 72).

 The Auto Setup feature does not apply for installations that use a cable box for all channel selection.

Using Auto Setup

- 1 Press **POWER** to turn on the TV.
- 2 Press **TV FUNCTION** on the remote control.
- 3 To continue running Auto Setup, press **CH+**. To exit Auto Setup, press **CH-**.

Auto Setup automatically creates a list of receivable channels. When finished, the lowest numbered channel is displayed.

To reset the TV to factory settings

- 1 Press **POWER** to turn on the TV.
- 2 Hold down **RESET** on the remote control.
- 3 Press **TV POWER** on the TV. (The TV will turn itself off, then back on.)
- 4 Release **RESET**.

Instalación del televisor

Resumen

En este capítulo se brindan instrucciones ilustradas para instalar el televisor.

Tema	Página(s)
Conectores y controles del televisor	10-13
Conexiones básicas: Conexión del cable o la antena	14-20
Conexión de equipo optativo	
Videograbadora y cable	22
Videograbadora y decodificador	24
Dos videograbadoras para el montaje de cintas	26
Receptor satelital	28
Receptor satelital y videograbadora	30
Reproductor de DVD con conectores de video componente	32
Reproductor de DVD con conectores S VIDEO y audio	34
Cámara de video	35
Receptor de audio	36
Uso de la función CONTROL S	37
Programación de la lista de canales	38

Nota sobre el cable eléctrico

El cable de corriente alterna está sujeto a la parte posterior del televisor mediante un gancho. Tenga cuidado al retirar la clavija de corriente alterna de su compartimiento. Deslice hacia arriba la clavija con suavidad para extraerla del gancho. Una vez extraída, la clavija se desacoplará automáticamente del sitio en el que está alojada.

 **No conecte el cable eléctrico hasta que haya realizado todas las demás conexiones.**

Conectores y controles del televisor

Panel frontal

Elemento	Descripción
1 MEMORY STICK (memoria MEMORY STICK)	Ranura para introducir el Memory Stick. Para mayores detalles, vea “Uso del visualizador de imágenes en Memory Stick” en la página 52.
2 MEMORY STICK LED (luz de MEMORY STICK)	Al iluminarse, indica que el televisor está leyendo el Memory Stick. (No extraiga el Memory Stick cuando este indicador esté iluminado.)
3 S VIDEO VIDEO 2 INPUT (entrada de VIDEO 2)	Se conecta con la salida S VIDEO OUT de su cámara de video u otro equipo de video que cuente con la función S VIDEO. Brinda mejor calidad de imagen que el video compuesto (4).
4 VIDEO/L (MONO)-AUDIO-R VIDEO 2 INPUT (entrada de VIDEO 2)	Se conecta a las conexiones de salida de audio y video de su cámara de video u otro equipo de video.
5 MENU (menú)	Presiónelo para ver el Menú. Vuélvalo a presionar para salir del Menú. Para mayores detalles, vea “Uso de los menús” en la página 63.
6 ↑ ↓ ← →	Presione ↑ ↓ ← → para mover el cursor en pantalla.
7 + SELECT (seleccionar)	Presiónelo para seleccionar la opción que esté resaltada en pantalla.
8 TV/VIDEO (televisor/videograbadora)	Presiónelo repetidamente para recorrer el equipo de video que esté conectado a las entradas de video del televisor.
9 -VOLUME + (volumen)	Presiónelos para ajustar el volumen.
10 -CHANNEL+ (canal)	Presiónelos para recorrer los canales. Para recorrerlos rápidamente, mantenga presionado uno de los botones CHANNEL.
11 TIMER LED (luz reloj)	Al iluminarse, indica que uno de los timers (reloj) está programado y en ese caso, esta luz permanece iluminada aun cuando el televisor se apaga. Para mayores detalles, vea la página 71.
12 STAND BY LED (luz en espera)	Parpadea cuando se enciende el televisor y posteriormente se apaga cuando aparece la imagen. Si esta luz parpadea continuamente indica que es necesario reparar el televisor.
13 Receptor de señal Infrarroja	Recibe las señales infrarrojas del control remoto del televisor.
14 POWER (encendido/apagado)	Presiónelo para encender y apagar el televisor.

Panel posterior

Elemento	Descripción
1 DVI-HDTV VIDEO AUDIO R/L (VIDEO 7 IN) (entrada de VIDEO 7)	Puede aceptar la conexión digital con protección contra copias (HDCP*) a otros dispositivos (como dispositivos de conexión inmediata digitales) si cuentan con interfaces compatibles. El terminal de entrada DVI-HDTV cumple con la norma EIA-861 y no tiene el fin de usarse con computadoras personales. Consulte el manual de instrucciones de su equipo para obtener detalles sobre cómo conectarlo y usarlo con el televisor.
2 S VIDEO IN 1/3/4 (entrada de S VIDEO en 1/3/4)	Se conecta a la salida S VIDEO OUT de su videograbadora u otro equipo de video que cuente con S VIDEO. S VIDEO brinda mejor calidad de imágenes que las conexiones de video compuesto (3) o VHF/UHF (9).
3 VIDEO IN 1/3/4 VIDEO/L(MONO) -AUDIO-R (entrada de video en 1/3/4 VIDEO/Izq.(MONOFÓNICO)- AUDIO-Der.)	Se conecta a las salidas de audio y video compuesto de su videograbadora u otro componente de video. Una cuarta entrada de audio y video (VIDEO 2) para componentes se encuentra en el panel frontal del televisor. Esta conexión de video brinda mejor calidad de imágenes que la conexión VHF/UHF (9).
4 MONITOR OUT (salida de monitor)	Permite grabar en una videograbadora el programa que esté viendo. Al conectar dos videograbadoras, puede utilizar el televisor como monitor para el montaje de cintas (no funciona con 480p, 720p ó 1080i si proviene de VIDEO 5-7).
5 AUDIO OUT (VAR/FIX) L(MONO)/R (salida de audio (VAR/FIJA) Izq. (MONOFÓNICO)/Der.)	Se conecta a las entradas de audio izquierda y derecha de su equipo de audio o video. Puede utilizar estas salidas para escuchar el audio de su televisor en su sistema de estéreo.
6 HD/DVD IN 5/6 (1080i/720p/480p/480i) (entrada de VIDEO 5/6)	Se conecta a las conexiones de video (Y, PB, PR) y audio (izq./der.) de video componente de su dispositivo de conexión inmediata digital o reproductor de DVD. El video componente brinda la mejor calidad de imágenes (mejor que 2 , 3 ó 9).
7 AUX (auxiliar)	Entrada auxiliar de señal de radiofrecuencia que se conecta a su antena, cable de CATV o salida de decodificador (caja convertidora de televisión por cable). Esto es cómodo al utilizar dos fuentes de VHF/UHF (antena, cable de CATV o decodificador). Para obtener mayores detalles, vea las páginas 16 a 19.
8 TO CONVERTER (al convertidor)	Se conecta a la entrada de su decodificador. Esta salida de VHF/UHF le permite programar su televisor para alternar entre canales codificados (recibidos mediante un decodificador) y canales normales de televisión por cable. Use esta salida en lugar de un bifurcador para obtener una mejor calidad de imagen cuando sea necesario cambiar entre canales de televisión por cable codificados y no codificados. Para obtener mayores detalles, vea las páginas 18 a 19.
9 VHF/UHF	Entrada primaria de señal de radiofrecuencia que se conecta al cable o a la antena VHF/UHF.
10 CONTROL S IN/OUT (entrada/salida de CONTROL S)	Permite al televisor recibir (IN) y enviar (OUT) señales de control remoto a otro equipo Sony de audio o video controlado mediante señales infrarrojas que cuente con la función CONTROL S.

*High-bandwidth Digital Content Protection (Cifrado de contenido digital de alto ancho de banda)

Conexiones básicas: Conexión del cable o la antena

Hay varias formas en que puede conectar su televisor, dependiendo de cómo se recibe la señal en su hogar (cable, decodificador, antena) y de si planea o no conectar una videgrabadora.

<i>Si conectará</i>	<i>Vea la página</i>
Sólo el cable o la antena	15
<input type="checkbox"/> Sin decodificador ni videgrabadora	
Sólo el cable y la antena	16
<input type="checkbox"/> Sin decodificador ni videgrabadora	
Sólo el decodificador y el cable	18
<input type="checkbox"/> El decodificador descodifica sólo algunos canales (generalmente los de paga)	
<input type="checkbox"/> Sin videgrabadora	
Sólo el decodificador	20
<input type="checkbox"/> El decodificador descodifica todos los canales	
<input type="checkbox"/> Sin videgrabadora	

Si conectará una videgrabadora

- ☐ Vea las conexiones descritas en las páginas 22 y 24.

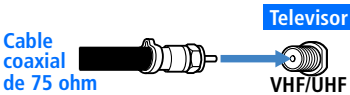

Sólo el cable o la antena

Para obtener los mejores resultados, use una de las siguientes conexiones si conectará el cable o la antena y:

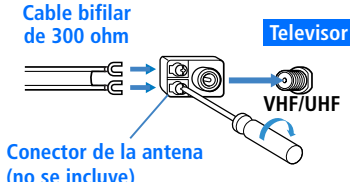

- ❑ No necesita un decodificador para descodificar los canales. (Si conectará un decodificador, vea las páginas 18-20.)
- ❑ No conectará una videograbadora. (Si conectará una videograbadora, vea las páginas 22 y 24.)

Como se muestra a continuación, la conexión que escoja dependerá del tipo de cable con que cuente su casa.

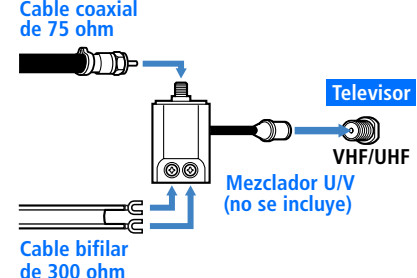

Cable coaxial de 75 ohm (generalmente en casas más nuevas)

Tipo de cable	Conectarlo de esta forma
Sólo VHF o combinación de VHF/UHF o cable	 <p>Cable coaxial de 75 ohm</p> <p>Televisor VHF/UHF</p>

Cable bifilar de 300 ohm (generalmente en casas más viejas)

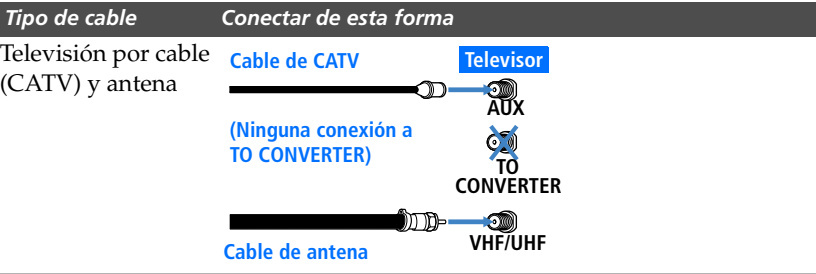

Tipo de cable	Conectarlo de esta forma
Sólo VHF o Sólo UHF o combinación de VHF/UHF	 <p>Cable bifilar de 300 ohm</p> <p>Conector de la antena (no se incluye)</p> <p>Televisor VHF/UHF</p>

Cable coaxial de 75 ohm y bifilar de 300 ohm (se encuentra en algunas casas)

Tipo de cable	Conectar de esta forma
VHF y UHF	 <p>Cable coaxial de 75 ohm</p> <p>Cable bifilar de 300 ohm</p> <p>Mezclador U/V (no se incluye)</p> <p>Televisor VHF/UHF</p>

Sólo el cable y la antena

- Para obtener los mejores resultados, realice las conexiones de esta forma si:
- ❑ Tiene cable y antena.
(Realizar las conexiones de esta forma es práctico si usará una antena de techo independiente para recibir los canales adicionales que no le brinda su compañía de televisión por cable.)
 - ❑ No conectará un decodificador ni una videgrabadora. (Si conectará un decodificador, vea las páginas 18 a 20. Si conectará una videgrabadora, vea las páginas 22 a 24.)

Uso de Twin View si realiza las conexiones de esta forma

Al realizar las conexiones de esta forma no podrá ver los canales del sistema de televisión por cable en la ventana derecha de Twin View.

Para obtener mayores detalles sobre Twin View, vea la página 47.

Notas para cuando realiza las conexiones de esta forma

Para ...	Haga esto...
Alternar la entrada del televisor entre la del cable y la antena	Presione ANT para alternar entre las entradas VHF/UHF y AUX del televisor.
Recibir canales por la antena en lugar de por el cable	<div><div>1</div><div>Presione ANT para cambiar a la entrada AUX.</div></div> <div><div>2</div><div>Establezca la opción Cable en No. Para obtener mayores detalles, vea “Selección de opciones de canal”, en la página 66.</div></div> <div><div>3</div><div>Ejecute el programa Autoajustes, como se describe en “Uso de Autoajustes” en la página 38.</div></div>

Sólo el decodificador y el cable

USUARIOS DE DECODIFICADORES DIGITALES: No utilicen esta conexión, ya que el conector TO CONVERTER (al convertidor) no es compatible con decodificadores digitales.

Para obtener los mejores resultados, realice las conexiones de esta forma si:

- ❑ Su compañía de cable codifica algunos canales, como los de paga (para los que debe usar un decodificador), pero no todos.
- ❑ No conectará una videograbadora. (Si conectará una videograbadora, vea las páginas 22 y 24.)

Si realiza las conexiones de esta forma, podrá:

- ❑ Usar el control remoto del televisor para cambiar los canales recibidos a través del decodificador mediante la entrada AUX del televisor. (Antes debe programar el control remoto para que funcione con su decodificador específico; vea “Programación del control remoto” en la página 43.)
- ❑ Usar el control remoto del televisor para cambiar los canales que el televisor recibe directamente en su entrada VHF/UHF. (El sintonizador de su televisor brinda una mejor señal que el decodificador.)

Uso de Twin View si realiza las conexiones de esta forma

Si realiza las conexiones de esta forma, podrá usar todas las funciones de Twin View en los canales no codificados que su televisor recibe directamente en la entrada VHF/UHF.

Sin embargo, sólo podrá usar algunas de las funciones de Twin View al ver canales que se reciben en la entrada VHF/UHF de su televisor a través del decodificador. Por ejemplo, cuando cambia la entrada del televisor a AUX —para seleccionar la entrada del decodificador—, la imagen aparecerá únicamente en la ventana izquierda. Si enciende Twin View, podrá ver en la ventana derecha los canales de cable que el televisor reciba en la entrada VHF/UHF, pero no podrá alternar las imágenes entre la ventana izquierda y derecha.

Para obtener mayores detalles sobre Twin View, vea la página 47.

Para conectar el decodificador y el cable

- 1 Conecte el cable de la compañía de cable al conector VHF/UHF de su televisor.
- 2 Utilice un cable coaxial para conectar el conector TO CONVERTER (al convertidor) de su televisor con la entrada del decodificador. (El convertidor interno del televisor le permite cambiar entre las señales no codificadas que el televisor recibe directamente y las señales codificadas que recibe mediante el decodificador, lo cual elimina la necesidad de utilizar un bifurcador externo.)
- 3 Utilice un cable coaxial para conectar la salida del decodificador con el conector AUX de su televisor.
- 4 Ejecute el programa Autoajustes, como se describe en “Programación de la lista de canales” en la página 38.

Si su decodificador es digital, no puede utilizar esta conexión porque el conector TO CONVERTER (al convertidor) no es compatible con ese tipo de decodificadores.

Notas para cuando realiza las conexiones de esta forma

Para...	Haga esto...
Usar el decodificador	Sintonice el televisor en el mismo canal en que haya sintonizado el decodificador (generalmente el 3 ó 4) y posteriormente use el decodificador para cambiar los canales.
Programar el control remoto del televisor para que funcione con el decodificador	Programe el control remoto. Vea “Programación del control remoto” en las páginas 43-44.
Activar el control remoto para que funcione con el decodificador	Presione SAT/CABLE FUNCTION (Función de satélite/cable).
Evitar que los canales puedan cambiarse por error	Cuando utilice el decodificador, el televisor deberá permanecer en el mismo canal en el que está sintonizado el decodificador (generalmente el 3 ó 4). Puede usar la función Fijar Canal del televisor para fijar un canal. Para obtener detalles, vea “Uso del menú Canal” en la página 68.
Alternar la entrada del televisor entre el decodificador y cable	Presione ANT para alternar entre las entradas VHF/UHF (canales no codificados) y AUX (codificados) del televisor.

Sólo el decodificador

Para obtener los mejores resultados, realice las conexiones de esta forma si:

- ❑ Su compañía de cable codifica todos los canales y por esto debe usar un decodificador.
- ❑ No conectará una videgrabadora. (Si conectará una videgrabadora, vea las páginas 22 y 24.)

Si realiza las conexiones de esta forma, podrá:

- ❑ Usar el control remoto del televisor para cambiar los canales recibidos a través del decodificador mediante el conector VHF/UHF del televisor. (Antes debe programar el control remoto para que funcione con su decodificador específico.)

Uso de Twin View si realiza las conexiones de esta forma

Cuando realiza las conexiones de esta forma, el televisor recibe todos los canales a través del decodificador y sólo una de las señales no codificadas se envía al televisor, por lo que no podrá usar la función Twin View. Si algunos de los canales están codificados y otros no, considere más bien realizar las conexiones como se indica en “Sólo el decodificador y el cable” en la página 18. Para obtener detalles sobre Twin View, vea la página 47.

Para conectar el decodificador

- 1 Conecte el cable del sistema de televisión por cable en el conector de entrada del decodificador.
- 2 Utilice un cable coaxial para conectar la salida del decodificador en el conector VHF/UHF del televisor.
- 3 Ejecute el programa Autoajustes, como se describe en “Programación de la lista de canales” en la página 38.

Notas para cuando realiza las conexiones de esta forma

Para...	Haga esto...
Usar el decodificador	Sintonice el televisor en el mismo canal en que haya sintonizado el decodificador (generalmente el 3 ó 4) y posteriormente use el decodificador para cambiar los canales.
Programar el control remoto del televisor para que funcione con el decodificador	Programe el control remoto. Vea “Programación del control remoto” en las páginas 43-44.
Activar el control remoto para que funcione con el decodificador	Presione SAT/CABLE FUNCTION (Función de satélite/cable).
Evitar que los canales puedan cambiarse por error	Cuando utilice el decodificador, el televisor deberá permanecer en el mismo canal en el que está sintonizado el decodificador (generalmente el 3 ó 4). Puede usar la función Fijar Canal del televisor para fijar un canal. Para obtener detalles, vea “Uso del menú Canal” en la página 68.

Conexión de equipo optativo

Siga las instrucciones de esta sección para conectar el siguiente equipo optativo:

<i>Si conectará</i>	<i>Vea la página</i>
Videgrabadora y cable	22
Videgrabadora y decodificador	24
Dos videgrabadoras para el montaje de cintas	26
Receptor satelital	28
Receptor satelital y videgrabadora	30
Reproductor de DVD con conectores de video componente	32
Reproductor de DVD con conectores S VIDEO y audio	34
Cámara de video	35
Receptor de audio	36

Uso de S VIDEO

Si el equipo optativo que conectará cuenta con un conector S VIDEO (como el de la izquierda), puede usar un cable de S VIDEO para obtener mejor calidad de imagen que la que ofrecería un cable de audio y video. Debido a que S VIDEO sólo transmite la señal de video, también deberá conectar cables de audio para el sonido, como se indica a continuación.

Una conexión de S VIDEO

Videograbadora y cable

Para obtener los mejores resultados, realice las conexiones de esta forma si:

- Su compañía de cable no exige el uso de un decodificador.

Uso de Twin View si realiza las conexiones de esta forma

Si realiza las conexiones de esta forma podrá usar todas las funciones de Twin View. Para obtener detalles sobre Twin View, vea la página 47.

Para conectar la videograbadora y el cable

- 1 Conecte el cable del sistema de televisión por cable en la entrada VHF/UHF de la videograbadora.
- 2 Utilice un cable coaxial para conectar la salida VHF/UHF de la videograbadora con el conector VHF/UHF del televisor.
- 3 Utilice un cable de audio y video para conectar las salidas de audio y video de la videograbadora con las entradas de audio y video del televisor.
- 4 Ejecute el programa Autoajustes, como se describe en "Programación de la lista de canales" en la página 38.

¿Desea usar los conectores de S VIDEO? Vea la página 21.

Los cables y conectores a menudo se codifican por colores. Conecte el rojo con el rojo, el blanco con el blanco, etc.

Cable de audio y video

Notas para cuando realiza las conexiones de esta forma

Para...	Haga esto...
Ver la señal de la videgrabadora	Presione TV/VIDEO hasta que quede seleccionada la entrada de la videgrabadora (VIDEO 1 en la ilustración).
Ver los canales de cable	Presione TV/VIDEO hasta que quede seleccionada la entrada de cable (VHF/UHF en la ilustración).
Programar el control remoto del televisor para que funcione con la videgrabadora	Si su videgrabadora no es marca Sony, debe programar el control remoto. Vea "Programación del control remoto" en las páginas 43-44.
Activar el control remoto del televisor para que funcione con la videgrabadora	Establezca el selector de audio y video en la misma posición en la que programó a la videgrabadora. Después presione VCR/DVD FUNCTION (Función de videgrabadora/DVD).
Controlar las funciones de la videgrabadora con el control remoto del televisor	Vea "Con una videgrabadora" en la página 60.
Asignar etiquetas de video a las señales de entrada para identificar fácilmente al equipo que haya conectado al televisor	Vea las instrucciones sobre la programación de Etiquetas de Video, en las páginas 72-73.

Videograbadora y decodificador

Para obtener los mejores resultados, realice las conexiones de esta forma si:

- ❑ Su compañía de cable codifica algunos canales, como los de paga (para los que debe usar un decodificador), pero no todos.

Uso de Twin View si realiza las conexiones de esta forma

Si realiza las conexiones de esta forma podrá usar todas las funciones de Twin View. Para obtener detalles sobre Twin View, vea la página 47.

Si realiza las conexiones de esta forma, podrá:

- ❑ Usar el control remoto del televisor para cambiar los canales que reciba mediante el decodificador. (Antes debe programar el control remoto para que funcione con su decodificador específico; vea “Programación del control remoto” en la página 43.)
- ❑ Usar el control remoto del televisor para cambiar los canales que se reciban directamente mediante el conector VHF/UHF del televisor. (El sintonizador del televisor brinda una mejor señal que el decodificador.)
- ❑ Grabar los canales que se reciben a través del decodificador y los que el televisor recibe directamente.

Para conectar una videograbadora y un decodificador se necesitarán:

- ❑ Un pequeño dispositivo, de costo módico, denominado bifurcador que puede adquirir en la tienda local de productos electrónicos.

USUARIOS DE DECODIFICADORES DIGITALES: Si desea conectar un decodificador digital, necesitará un bifurcador bidireccional especial que esté diseñado para funcionar con su decodificador digital. Comuníquese con su proveedor de servicio de cable para obtener los detalles.

- ❑ Tres cables coaxiales.
- ❑ Un cable de audio y video o uno de S VIDEO y cables para audio.

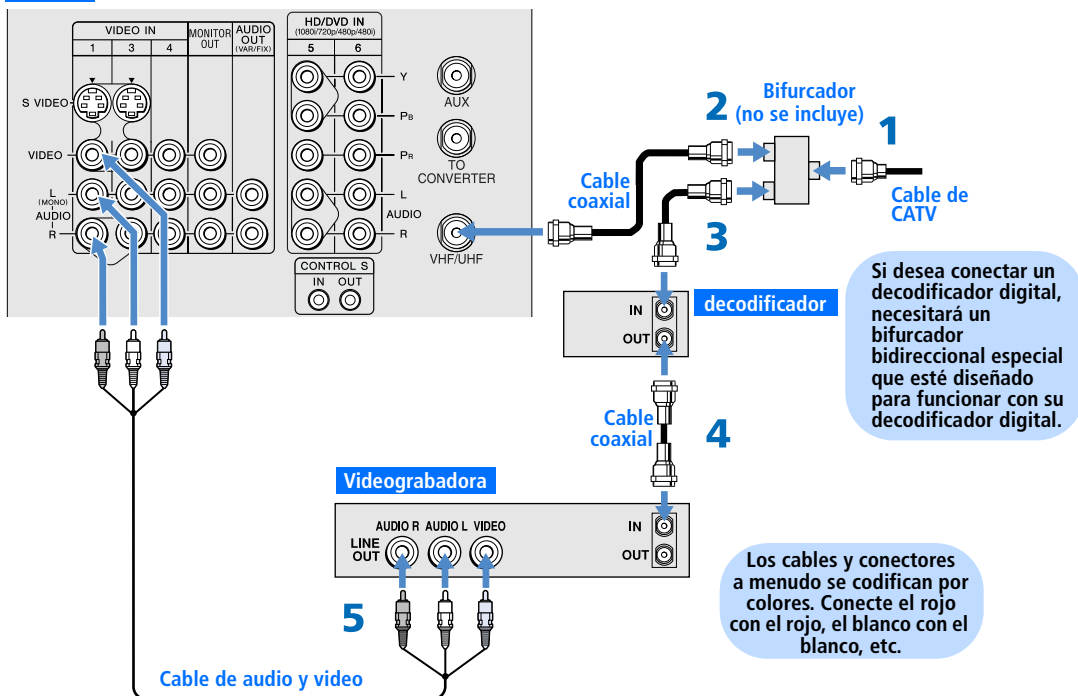

Para conectar la videograbadora y el decodificador

- 1 Conecte el cable del sistema de televisión por cable a la entrada única del bifurcador.
- 2 Utilice un cable coaxial para conectar una de las dos salidas del bifurcador a la entrada para VHF/UHF del televisor.
- 3 Utilice un cable coaxial para conectar la otra salida del bifurcador a la entrada del decodificador.
- 4 Utilice un cable coaxial para conectar la salida del decodificador a la entrada de RF (radiofrecuencia) de la videograbadora.
- 5 Utilice un cable de audio y video para conectar las salidas de audio y video de la videograbadora con las entradas de audio y video del televisor.
- 6 Ejecute el programa Autoajustes, como se describe en “Programación de la lista de canales” en la página 38.

¿Desea usar los conectores de S VIDEO? Vea la página 21.

Televisor

Notas para cuando realiza las conexiones de esta forma

Para...	Haga esto...
Ver los canales de cable (no codificados)	Presione TV/VIDEO hasta que quede seleccionada la entrada de cable (VHF/UHF en la ilustración).
Ver los canales del decodificador (codificados)	Encienda la videogradora y sintonícela en el mismo canal en que sintonizó el decodificador (generalmente el 3 ó 4). Presione TV/VIDEO hasta que quede seleccionada la entrada de la videogradora (VIDEO 1 en la ilustración). Use el decodificador para cambiar los canales.
Ver la señal de la videogradora	Presione TV/VIDEO hasta que quede seleccionada la entrada de la videogradora (VIDEO 1 en la ilustración).
Programar el control remoto del televisor para que funcione con el decodificador o la videogradora	Si su videogradora no es marca Sony, debe programar el control remoto. Vea "Programación del control remoto" en las páginas 43-44.
Activar el control remoto para que funcione con el decodificador o la videogradora	Para el decodificador presione SAT/CABLE FUNCTION (Función de satélite/cable). Para la videogradora, coloque el selector de audio y video en la misma posición en la que haya programado la videogradora. Después presione VCR/DVD FUNCTION .
Controlar funciones específicas del decodificador y la videogradora con el control remoto del televisor	Vea "Con un decodificador" en la página 61 y "Con una videogradora" en la página 60.
Asignar etiquetas de video a las señales de entrada para identificar fácilmente al equipo que haya conectado al televisor	Vea las instrucciones sobre la programación de Etiquetas de Video en las páginas 72-73.

Dos videograbadoras para el montaje de cintas

¿Desea usar los
conectores de
S VIDEO? Vea la
página 21.

Si conecta dos videograbadoras, podrá grabar de una a la otra y si las conecta como se indica a continuación, podrá ver (monitorizar) lo que se esté grabando.

Para conectar dos videograbadoras para el montaje de cintas

- 1 Utilice un cable de audio y video para conectar las salidas de audio y video de la videograbadora de reproducción a las entradas de audio y video del televisor.
- 2 Utilice un cable de audio y video para conectar las entradas de audio y video de la videograbadora a los conectores MONITOR OUT (Salida de monitor) del televisor.

Notas para cuando realiza las conexiones de esta forma

Para...	Haga esto...
Ver (monitorizar) lo que se está grabando	Presione TV/VIDEO hasta que quede seleccionada la entrada de la videgrabadora (VIDEO 1 en la ilustración anterior).
Programar el control remoto del televisor para que funcione con la(s) videgrabadora(s)	Si su videgrabadora no es marca Sony, debe programar el control remoto. Vea “Programación del control remoto” en las páginas 43-44.
Activar el control remoto del televisor para que funcione con la(s) videgrabadora(s)	Coloque el selector de audio y video en la misma posición en la que haya programado la videgrabadora. Después presione VCR/DVD FUNCTION (Función de videgrabadora/DVD).
Controlar las funciones de videgrabadora con el control remoto del televisor	Vea “Con una videgrabadora” en la página 60.
Asignar etiquetas de video a las señales de entrada para identificar fácilmente al equipo que haya conectado al televisor	Vea las instrucciones sobre la programación de Etiquetas de Video en las páginas 72-73.

Receptor satelital

¿Desea usar los conectores de S VIDEO? Vea la página 21.

Para conectar un receptor satelital

- 1 Conecte el cable de la antena satelital a la entrada satelital del receptor satelital.
- 2 Utilice un cable de audio y video para conectar las salidas de audio y video del receptor satelital a las entradas de audio y video del televisor.
- 3 Conecte el cable del sistema de televisión por cable desde su cable o antena al conector VHF/UHF de su televisor.
- 4 Ejecute el programa Autoajustes, como se describe en "Programación de la lista de canales" en la página 38.

Televisor

Los cables y conectores a menudo se codifican por colores. Conecte el rojo con el rojo, el blanco con el blanco, etc.

Notas para cuando realiza las conexiones de esta forma

Para...	Haga esto...
Ver la señal proveniente del receptor satelital	Presione TV/VIDEO hasta que quede seleccionada la entrada del receptor satelital (VIDEO 1 en la ilustración).
Programar el control remoto del televisor para que funcione con el receptor satelital	Si su receptor satelital no es marca Sony, debe programar el control remoto. Vea “Programación del control remoto” en las páginas 43-44.
Activar el control remoto del televisor para que funcione con el receptor satelital	Presione SAT/CABLE FUNCTION (Función de satélite/cable).
Controlar las funciones del receptor satelital con el control remoto del televisor	Vea “Con un receptor satelital” en la página 61.
Asignar etiquetas de video a las señales de entrada para identificar fácilmente al equipo que haya conectado al televisor	Vea las instrucciones sobre la programación de Etiquetas de Video en las páginas 72-73.

Receptor satelital y videograbadora

¿Desea usar los conectores de S VIDEO? Vea la página 21.

Para conectar un receptor satelital y una videograbadora

- 1 Conecte el cable de la antena satelital a la entrada satelital del receptor satelital.
- 2 Conecte el cable del sistema de televisión por cable a la entrada VHF/UHF de la videograbadora.
- 3 Utilice un cable coaxial para conectar la salida VHF/UHF de la videograbadora al conector VHF/UHF del televisor.
- 4 Utilice un cable de audio y video para conectar las salidas de audio y video del receptor satelital a las entradas de audio y video de la videograbadora.
- 5 Utilice un cable de audio y video para conectar las salidas de audio y video de la videograbadora a las entradas de audio y video del televisor.
- 6 Ejecute el programa Autoajustes, como se describe en "Programación de la lista de canales" en la página 38.

Los cables y conectores a menudo se codifican por colores. Conecte el rojo con el rojo, el blanco con el blanco, etc.

Notas para cuando realiza las conexiones de esta forma

Para...	Haga esto...
Ver la señal proveniente del receptor satelital	Presione TV/VIDEO hasta que quede seleccionada la entrada de la videgrabadora (VIDEO 1 en la ilustración). Es posible que la videgrabadora deba estar encendida y preparada para recibir la entrada del receptor satelital.
Ver la videgrabadora	Presione TV/VIDEO hasta que quede seleccionada la entrada a la que está conectada la videgrabadora (VIDEO 1 en la ilustración).
Programar el control remoto del televisor para que funcione con el receptor satelital o la videgrabadora	Si su videgrabadora o receptor satelital no es marca Sony, debe programar el control remoto. Vea “Programación del control remoto” en las páginas 43-44.
Activar el control remoto del televisor para que funcione con el receptor satelital o la videgrabadora	Para el receptor satelital presione SAT/CABLE FUNCTION (Función de satélite/cable). Para la videgrabadora, coloque el selector de audio y video en la misma posición en la que haya programado la videgrabadora y después presione VCR/DVD FUNCTION .
Controlar las funciones del receptor satelital y la videgrabadora con el control remoto del televisor	Vea “Con un receptor satelital” en la página 61 y “Con una videgrabadora” en la página 60.
Asignar etiquetas de video a las señales de entrada para identificar fácilmente al equipo que haya conectado al televisor	Vea las instrucciones sobre la programación de Etiquetas de Video en las páginas 72-73.

Reproductor de DVD con conectores de video componente

Para obtener los mejores resultados, realice las conexiones de esta forma si su reproductor de DVD cuenta con conectores de video componente (Y, Pb, Pr).

Para conectar un reproductor de DVD con conectores de video componente

- 1 Utilice tres cables de video componente separados para conectar los conectores Y, Pb y Pr del reproductor de DVD a los conectores Y, Pb y Pr (VIDEO 5) del televisor.

 En ocasiones, los conectores Y, Pb y Pr de los reproductores DVD están marcados Y, Cb y Cr o Y, B-Y y R-Y, en cuyo caso deberá conectar los cables de manera que los colores coincidan.

- 2 Utilice un cable de audio para conectar las salidas de audio del reproductor de DVD a las entradas de audio VIDEO 5 del televisor.

Notas para cuando realiza las conexiones de esta forma

Para...	Haga esto...
Ver la señal proveniente del reproductor de DVD	Presione TV/VIDEO hasta que quede seleccionada la entrada DVD (VIDEO 5 en la ilustración).
Programar el control remoto del televisor para que funcione con el reproductor de DVD	Si su reproductor de DVD no es marca Sony, debe programar el control remoto. Vea "Programación del control remoto" en las páginas 43-44.
Activar el control remoto del televisor para que funcione con el reproductor de DVD	Coloque el selector de audio y video en la misma posición en la que haya programado el reproductor de DVD. Después presione VCR/DVD FUNCTION (Función de videograbadora/DVD).
Controlar las funciones del reproductor de DVD con el control remoto del televisor	Vea "Con un reproductor de DVD" en la página 62.
Asignar etiquetas de video a las señales de entrada para identificar fácilmente al equipo que haya conectado al televisor	Vea las instrucciones sobre la programación de Etiquetas de Video en las páginas 72-73.

No es posible grabar la señal proveniente de equipo conectado a los conectores Y, PB, PR.

Reproductor de DVD con conectores S VIDEO y audio

Realice las conexiones de esta forma si su reproductor de DVD no cuenta con conectores de video componente (Y, PB, PR).

Para conectar un reproductor de DVD que tenga conectores de audio y video

- 1 Utilice un cable de audio para conectar las salidas de audio del reproductor de DVD con las entradas de audio del televisor.
- 2 Utilice un cable de S VIDEO para conectar el conector S VIDEO del reproductor de DVD con el conector S VIDEO del televisor.

Los cables y conectores a menudo se codifican por colores. Conecte el rojo con el rojo, el blanco con el blanco, etc.

Notas para cuando realiza las conexiones de esta forma

Para...	Haga esto...
Ver la señal proveniente del reproductor de DVD	Presione TV/VIDEO hasta que quede seleccionada la entrada DVD (VIDEO 1 en la ilustración).
Programar el control remoto del televisor para que funcione con el reproductor de DVD	Si su reproductor de DVD no es marca Sony, debe programar el control remoto. Vea "Programación del control remoto" en las páginas 43-44.
Activar el control remoto del televisor para que funcione con el reproductor de DVD	Coloque el selector de audio y video en la misma posición en la que haya programado el reproductor de DVD. Después presione VCR/DVD FUNCTION (Función de videgrabadora/DVD).
Controlar las funciones de DVD con el control remoto del televisor	Vea "Con un reproductor de DVD" en la página 62.
Asignar etiquetas de video a las señales de entrada para identificar fácilmente al equipo que haya conectado al televisor	Vea las instrucciones sobre la programación de Etiquetas de Video en las páginas 72-73.

Cámara de video

¿Desea usar los conectores de S VIDEO? Vea la página 21.

Para facilitar la conexión de una cámara de video, la parte delantera del televisor cuenta con entradas para audio y video. Sin embargo, si prefiere, puede conectar la cámara a las entradas de audio y video en la parte posterior del televisor.

Para conectar una cámara de video

- 1 Utilice cables de audio y video para conectar las salidas de audio y video de la cámara de video con las entradas de audio y video del televisor.

Si la cámara de video es monofónica, conecte su salida de audio al conector de audio L MONO (monofónico izq.) del televisor.

Notas para cuando realiza las conexiones de esta forma

Para...	Haga esto...
Ver la cámara de video	Presione TV/VIDEO hasta que quede seleccionada la entrada de cámara de video (VIDEO 2 en la ilustración).
Asignar etiquetas de video a las señales de entrada para identificar fácilmente al equipo que haya conectado al televisor	Vea las instrucciones sobre la programación de Etiquetas de Video en las páginas 72-73.

Receptor de audio

Para obtener la mejor calidad de sonido se recomienda que use su sistema de estéreo para reproducir el audio del televisor.

Para conectar un sistema de audio

- 1 Utilice un cable de audio para conectar las salidas de audio del televisor con las entradas de línea del receptor de audio.

Los cables y conectores a menudo se codifican por colores. Conecte el rojo con el rojo, el blanco con el blanco, etc.

- 2 Utilice el menú Audio del televisor para establecer la opción **Bocinas** en **No**. Después, establezca la opción **Salida de Audio** en **Fija** o **Variable**, según la forma en que desee controlar el volumen. Para obtener detalles, vea "Uso del menú Audio" en la página 66.
- 3 Encienda el receptor de audio y después establezca la entrada de línea del receptor en el conector al que haya conectado el televisor.

Uso de la función **CONTROL S**

La función CONTROL S le permite controlar, con el mismo control remoto, tanto su sistema como otros aparatos Sony. Además de esto, esta función le permite apuntar su control remoto únicamente a su televisor, en lugar de tener que estarlo apuntando a otros aparatos, que podrían estar ocultos o fuera de su alcance visual.

Utilice CONTROL S IN para enviar la señal al televisor.

Utilice CONTROL S OUT para enviar señales a otros aparatos que tenga conectados.

Programación de la lista de canales

Una vez conectado el televisor, se debe ejecutar Autoajustes para identificar los canales que se sintonizarán. Al encender su televisor por primera vez después de instalarlo, aparecerá la pantalla de Autoajustes. Si no desea que el televisor identifique los canales en ese momento, podrá hacerlo posteriormente mediante la opción Autoprogramación ubicada en el menú Canal (vea la página 68).

La función Autoajustes no corresponde a instalaciones que utilizan un decodificador para seleccionar los canales.

Uso de Autoajustes

- 1 Presione el botón **POWER** (encendido/apagado) para encender el televisor.
- 2 Presione el botón **TV FUNCTION** (Función de televisor) del control remoto.
- 3 Para continuar ejecutando Autoajustes, presione **CH+**. Para salir de Autoajustes, presione **CH-**.

La función Autoajustes creará automáticamente una lista de los canales que el televisor podrá recibir. Una vez terminado Autoajustes, aparecerá en la pantalla el canal de numeración más baja.

Para restablecer los ajustes de fábrica del televisor

- 1 Presione el botón **POWER** (encendido/apagado) para encender el televisor.
- 2 Mantenga presionado el botón **RESET** (restablecer) del control remoto.
- 3 Presione el botón **TV POWER** en el televisor. (El televisor se apagará y después volverá a encenderse.)
- 4 Suelte el botón **RESET** (restablecer).

PRINTING THE SERVICE MANUAL

The PDF of this service manual is not designed to be printed from cover to cover. The pages vary in size, and must therefore be printed in sections based on page dimensions.

NON-SCHEMATIC PAGES

Data that does NOT INCLUDE schematic diagrams are formatted to 8.5 x 11 inches and can be printed on standard letter-size and/or A4-sized paper.

SCHEMATIC DIAGRAMS

The schematic diagram pages are provided in two ways, full size and tiled. The full-sized schematic diagrams are formatted on paper sizes between 8.5" x 11" and 18" x 30" depending upon each individual diagram size. Those diagrams that are LARGER than 11" x 17" in full-size mode have been tiled for your convenience and can be printed on standard 11" x 17" (tabloid-size) paper, and reassembled.

TO PRINT FULL SIZE SCHEMATIC DIAGRAMS

If you have access to a large paper plotter or printer capable of outputting the full-sized diagrams, output as follows:

- 1) Note the page size(s) of the schematics you want to output as indicated in the middle window at the bottom of the viewing screen.
- 2) Go to the File menu and select Print Set-up. Choose the printer name and driver for your large format printer. Confirm that the printer settings are set to output the indicated page size or larger.
- 3) Close the Print Set Up screen and return to the File menu. Select "Print..." Input the page number of the schematic(s) you want to print in the print range window. Choose OK.

TO PRINT TILED VERSION OF SCHEMATICS

Schematic pages that are larger than 11" x 17" full-size are provided in a 11" x 17" printable tiled format near the end of the document. These can be printed to tabloid-sized paper and assembled to full-size for easy viewing.

If you have access to a printer capable of outputting the tabloid size (11" x 17") paper, then output the tiled version of the diagram as follows:

- 1) Note the page number(s) of the schematics you want to output as indicated in the middle window at the bottom of the viewing screen.
- 2) Go to the File menu and select Print Set-up. Choose the printer name and driver for your printer. Confirm that the plotter settings are set to output 11" x 17", or tabloid size paper in landscape () mode.
- 3) Close the Print Set Up screen and return to the File menu. Select "Print..." Input the page number of the schematic(s) you want to print in the print range window. Choose OK.

TO PRINT SPECIFIC SECTIONS OF A SCHEMATIC

To print just a particular section of a PDF, rather than a full page, access the Graphics Select tool in the Acrobat Reader tool bar.

- 1) To view the Graphics Select Tool, press and HOLD the mouse button over the Text Select Tool which looks like: . This tool will expand to reveal additional tools. Choose the Graphics Select tool by placing the cursor over the button on the far right that looks like: .
- 2) After selecting the Graphics Select Tool, place your cursor in the document window and the cursor will change to a plus (+) symbol. Click and drag the cursor over the area you want to print. When you release the mouse button, a marquee (or dotted lined box) will be displayed outlining the area you selected.
- 3) With the marquee in place, go to the file menu and select the "Print..." option. When the print window appears, choose the option under the section called "Print Range" which says "Selected Graphic".

Select OK and the output will print only the area that you outlined with the marquee. 

(continued >)

ON-SCREEN SEARCH OPTION

All of the text within the service manual PDF is content searchable. This means that you can enter any text, word, phrase or reference number that appears in the manual, and the PDF software will search, find and move the cursor to the location where you requested text first appears. This feature can be particularly useful in locating components on a specific schematic or printed wire circuit board (PWB) diagrams.

Follow these steps to effectively locate a component on a schematic diagram:

- 1) Locate the schematic you want to search by clicking on the corresponding bookmark on the left side of the screen. The view on the right of the screen will then jump to the desired schematic page.
- 2) Magnify the diagram to at least 400% before conducting a component search. This will enable you to easily view the reference number when it is highlighted on screen. To do this, click on the magnifying glass button on the tool bar at the top of the screen. Move the cursor over the diagram and RIGHT click you mouse. Select the 400% magnification option on the pop-up menu. Click on the button with the icon of the open hand to deactivate the magnification tool
- 3) Search the diagram (or the entire manual) by clicking on the binocular button tool at the top of the screen. The "Find" window will appear and allow you to type in your desired text. Type in a reference designator, such as R502, and click on the "Find" button. If the component is not on the diagram, but is listed anywhere else in the manual, the cursor will jump to the first location the text is found in the file. To find another instance of that same text, click on the binocular button again and select "Find Again."
